

Product Guide 2023/24

Next Level of Compressed Air, Gas
and Liquid Monitoring

Be smart. Measure it.

Advanced Measurement Solutions

Compressed Air and Gas Monitoring - get your system under control

The use of compressed air and technical gases in modern production processes has become indispensable. Compressed air is used to drive actuators, machines and to control other automated processes. Technical gases and air are used to conserve food or are even becoming part of the product, like in the beverage production.

This leads to two crucial aspects:

1

Energy Consumption

Air compressors typically convert ~80 ... 90 % of the electrical energy into heat and only 10 ... 20 % into compressed air. This makes compressed air 5 to 10 times more expensive than electricity. Measuring and Monitoring compressors, the consumptions, pressure and flow rates becomes major part in a world with limited energy resources.

2

Purity and Quality

Having air and gases becoming a part of your product and process means, that we need to have a control system in place, insuring that filtration systems are working as they should, 24 hours a day, 7 days a week. Only by regular measurements or by using monitoring solutions this can be achieved.

Flow Meters Compressed Air & Gas

Dew Point Sensors

Leak Detection

Application Software

Why monitor compressed air and gases?

- ✔ System Performance and Reliability
- ✔ Energy Efficiency and Cost Reduction
- ✔ Product Quality and Safety
- ✔ ISO Purity Requirements

Be smart.

SUTO is a leader and trusted global partner

for reliable measurement and monitoring solutions for compressed air and gas systems.

Our wide range of products play a vital role in system processes of leading companies around the world.

Since our foundation in 2005, we offer our customers outstanding service and solutions and continue to innovate dependable measurement technology.

WHY SUTO

Years of Experience

We look back on many years of experience working in the compressed air and gas market. We are a trusted global partner by delivering value-creating solutions.

Design Driven

Many customers require unique and custom-designed solutions. We adapt to full-scale, personalized systems, ensuring the best possible solution.

Product Knowledge

We provide a wide portfolio of compressed air and gas devices and solutions which can be seamlessly integrated into your systems and processes without causing downtimes.

Powered by Innovation

We are pioneers in compressed air measurement by rethinking traditional methods and reaching new levels of time-efficient measurement, while constantly improving our portfolio.

S401 / S421

Thermal Mass Flow Meter

Insertion / Inline

S401

S421

PROCESS MONITORING
High accuracy and reliable measurements

TOTALIZER INTEGRATED
Total consumption stored internally

S401 INSERTION METER
Installation under pressure

MOBILE APP
For remote configuration

INTEGRATED DISPLAY
For on site values

S421 IN-LINE METER
High accuracy and easy to install

Benefits

- ✓ S401 can be installed under pressure through a 1/2" ball valve
- ✓ S421 with measuring section for accurate and reliable readings
- ✓ No additional pressure or temperature compensation needed, thanks to thermal mass flow measurement
- ✓ Fast response time with a wide measuring range
- ✓ Thermal mass flow meter can be used in different process gases like: N₂, CO₂, O₂ and many other technical gases

1 Optional Color Display

On-site display for live value readings, total consumption counter and convenient sensor settings. Totalizer with 10 digits (1 999 999 999)

2 Various Outputs

S401 and S421 thermal mass flow meters are perfectly suited to be integrated into process controls or high-level monitoring systems. Various output options are offered for a seamless integration:

- Isolated 4... 20 mA output for actual flow readings
- Isolated Pulse output for totalizer
- Modbus/RTU to read all values digitally
- Modbus/TCP with PoE support to connect the meters to the local network and power them via Ethernet

3 Robust Materials

The industrial IP65 Polycarbonate-ABS housing offers the best protection in rough environments. The metal parts are made from high grade stainless steel, made to last forever.

4 Flexible and Easy Installation

- The insertion type flow meters supports any pipe size from 1" up to 12" or even bigger pipes. Thanks to the insertion through a 1/2" ball valve, the S401 can be installed under pressure and is perfectly suited for installations where shutdowns are not acceptable.
- The in-line type are offered with measuring sections from 1/2" up to 3" and can be easily integrated into existing piping systems.

5 Thermal Mass Flow Sensor

The build in sensor is using the thermal mass flow principle. This comes with main advantages:

- The sensor can cover a wide measuring range at high accuracy.
- The fast response times, no moving parts and minimal pressure loss are making them most suited sensors for volumetric flow and consumption measurement of compressed air and gases.
- There is no need to compensate the line pressure and temperature additionally, making them most efficient in terms of installations and costs.

Wireless Connection

The unique wireless connection on every flow meter is unlike its competition. Through the free S4G-FS App, live values can be read from the meters.

But not only during operation, the smartphone app is useful. Especially during installation and setup all settings can be performed using a smartphone, there is no need to carry a PC and an interface on site. This saves a lot of time and is the easiest way to get reliable sensor readings.

Every sensor is protected by default, to perform changes on the flow meter, first a QR code must be scanned.

Installation and Sensor Removal

S401

S401 can be installed under pressure through a 1/2" ball valve. The sensor tip must be in the pipes center.

- Tube diameters of DN25 and above
- 2 installation types: center installation and 100 mm insertion depth installation for bigger pipes (> DN250)
- Installation under pressure through 1/2" ball valve

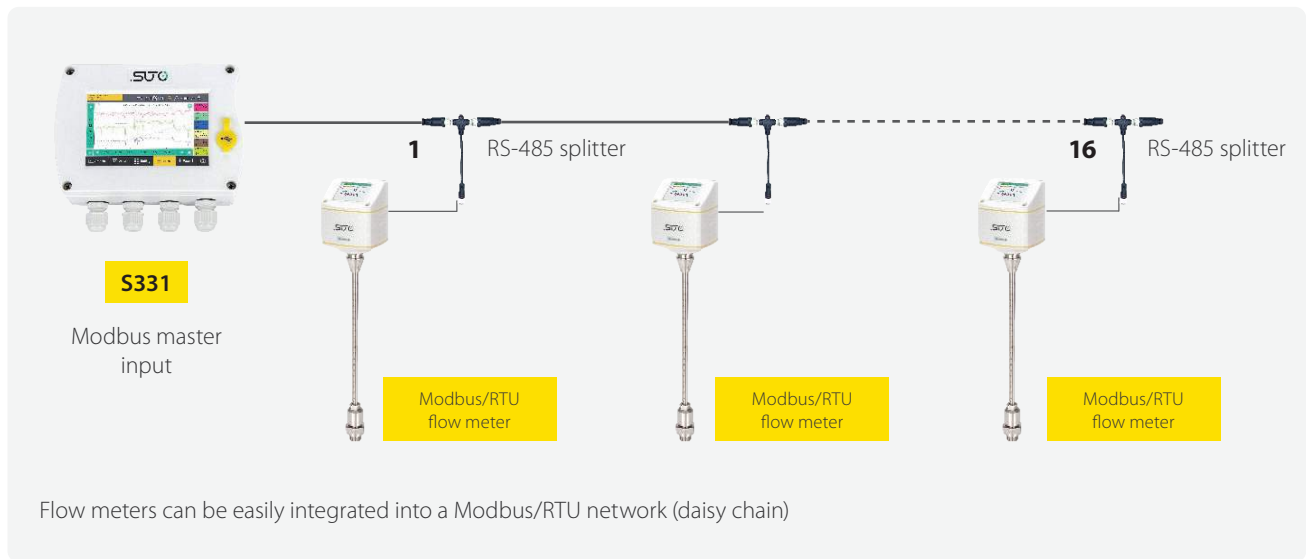

S421

The S421 sensor unit can be easily removed for calibration. (Closing cap separately available)

- Pipes sizes available: DN15, DN20, DN32, DN40, DN50, DN65, DN80
- Fits your needs: various process connections available (R-thread, EN 1092-1 flange or ANSI flange)
- Exchangeable sensor unit (easy sensor swap)
- Optional flow conditioner, no need for a straight inlet anymore

Connect several Flow Meters to Modbus Master

Volumetric Flow Ranges

Pipe Specifications			S401			S421

Technical Data

Measurement

Flow

Accuracy	1.5 % of reading \pm 0.3 % FS (optional 1 % of reading)
Selectable units	m ³ /h, m ³ /min, l/min, l/s, cfm, kg/h, kg/min, kg/s
Repeatability	0.25 % of reading
Sensor	Thermal mass flow sensor
Sampling rate	10 samples / sec
Turndown ratio	200:1
Response time (t90)	0.1 sec

Consumption

Selectable units	m ³ , ft ³ , l
------------------	--------------------------------------

Reference conditions

Selectable conditions	20 °C 1000 mbar (ISO1217), 0 °C 1013 mbar (DIN1343) freely adjustable
-----------------------	---

Signal / Interface & Supply

Analog output

Signal	4 ... 20 mA (4-wire), isolated
Scaling	0 ... max flow, freely adjustable
Load	max. 250 Ohm
Update rate	Value updated ever 1 sec

Pulse output

Signal	Switch output, normally open, max. 30 VDC, 20 mA
Scaling	1 pulse per consumption unit (selectable)

Fieldbus

Protocol	Modbus/RTU, Modbus/TCP
Update rate	Value updated ever 1 sec

Supply

Voltage supply	15 ... 30 VDC
Current consumption	max. 200 mA

General data

Configuration

Wireless	S4C-FS App for mobile phones
PC Software	USB Service Kit + Software
Others	Display with 2 touch buttons

Display

Integrated	2.4" color graphic display with 3 touch buttons
------------	--

Material

Process connection	Stainless steel 1.4404 (SUS 316L)
Housing	PC + ABS
Sensor	Ceramic, glass coated
Metal parts	Stainless steel 1.4404 (SUS 316L)

Miscellaneous

Electrical connection	2 x M12 (5 pole); 1 x M12 (8-pole x-coded) for TCP
Protection class	IP65
Approvals	CE, RoHS, FCC
Process connection	S401: G1/2" (ISO 228/1) S421: Measuring section with R-thread or Flange

Weight

S401: 0.9 kg S421: 0.4 kg (without measuring section)

Operating conditions

Medium	Air, N ₂ , O ₂ , CO ₂ and other gases
Medium quality	ISO 8573: 4.4.3 or better
Medium temperature	-30 ... +140 °C
Medium humidity	< 90 % rH, no condensation
Operating pressure	max. 5.0 MPa (> 1.6 MPa need installation device)
Ambient temperature	-30 ... +70 °C, -10 ... +50 °C (with display)
Ambient humidity	< 99 % rH
Storage temperature	-30 ... +70 °C
Transport temperature	-30 ... +70 °C
Pipe sizes	S401: 1/2" ... 12" (bigger pipes on request) S421: 1/2" ... 3"

Ordering

Please use the following tables to assist in placing your order with our sales staff.

S401 Thermal Mass Flow Meter (Insertion type)

Order No.	Description
S695 4100	S401 Thermal Mass Flow Meter, 220 mm shaft
S695 4101	S401 Thermal Mass Flow Meter, 300 mm shaft
S695 4102	S401 Thermal Mass Flow Meter, 400 mm shaft
S695 4103	S401 Thermal Mass Flow Meter, 160 mm shaft
Flow Medium 1	
A1007	Option, flow medium Air
A1008	Option, flow medium CO ₂
A1009	Option, flow medium O ₂ (cleaning for oil and grease-free)
A1010	Option, flow medium N ₂
A1011	Option, flow medium N ₂ O
A1012	Option, flow medium Argon
A1013	Option, flow medium Natural Gas
A1014	Option, flow medium H ₂ (For real gas calibration. Please consult manufacturer for this option in advance)
A1015	Other gas (specify gas or gas mix)
A1016	Option, flow medium He (real gas calibration)
A1017	Option, flow medium Propane C ₃ H ₈
A1041	Option, flow medium O ₂ , Ar, CO ₂ (real gas calibration)
A1042	Option, flow medium CH ₄ , NG, N ₂ O (real gas calibration, please consult with manufacturer for this option in advance)
Flow Medium 2 (same selection as above)	
A1003	No 2nd Gas
Range	
A1408	S401: Standard range version (92.7 m/s)
A1401	S401: Max range version (185 m/s)
A1402	S401: High speed range version (220 m/s)
A1403	S401/S421: Low range version (1/3 of standard range)
A1407	S401/S421: Vacuum / Atmospheric range (1/3 of standard range)
Calibration	
A1409	S401/S421: Standard calibration
A1405	S401: Bi-directional calibration
A1404	S401/S421: High accuracy calibration (1 % ± 0.3 % F.S.)
Output	
A1410	Isolated 4 ... 20 mA + pulse output
A1411	Modbus/RTU output
A1413	S401/S421: 4 ... 20 mA + pulse output (pin compatible to S400 / 420)
A1424	Modbus/TCP output with PoE support
Display	
A1425	No Display
A1420	Color graphics display, 2.4" with keypad

S401 Thermal Mass Flow Meter (Insertion type)

Order No.	Description
Accessories	
A695 0008	S401: NPT1/2" thread adapter (former A1005)
A695 0009	S401: PT1/2" thread adapter (former A1006)
A553 0104	Sensor cable, 5 m with M12 connector, open wires, AWG 24 (0.2 mm ²)
A553 0105	Sensor cable, 10 m with M12 connector, open wires, AWG 24 (0.2 mm ²)
A553 0154	Cable to connect power bank, 1.8 m, USB-C connector for power bank, M12 connector

Example:

S401 220 mm shaft, Air, No 2nd Gas, Max range, Standard calibration, Isolated 4 ... 20 mA output, Display

S415

Compact Thermal Mass Flow Meter

Eco-Inline

COMPACT DESIGN

Can be installed anywhere

SMARTPHONE ANDROID APP

For remote configuration

POINT-OF-USE MEASUREMENT

Monitor machines and air consumers

TOTAL FLOW

No bypass measurement

ACCURATE RESULTS

Integrated flow conditioner

INTEGRATED DISPLAY

For on site values

Benefits

- ✔ Compact flow meter for installation directly at the point-of use
- ✔ Various process connection sizes available: DN8, DN15, DN20, DN25 and DN32 (G-inner-thread)
- ✔ Economic flow and consumption metering at low investments
- ✔ Machine operation costs and consumption monitoring
- ✔ Integrated flow conditioner eliminates the need of straight inlet sections

Cost-efficient Eco Version – Flexible Installation

The S415 Thermal Mass Flow Meters offers compressed air flow and consumption measurement directly at the point of use with seamless integration.

These highly economical units will help you improve compressed air system efficiency, while helping reduce compressed air usage and operating costs.

The S415 come standard with wireless communication interface to help the user quickly and easily check the flow meter readings or adjust the settings via the SUTO flow meter app.

Point of Use Applications

The S415 is best suited to general process work where low cost and broad monitoring of the compressed air flow is required.

Easily monitor the compressed air flow and consumption of individual machines and processes to improve efficiency and reliability.

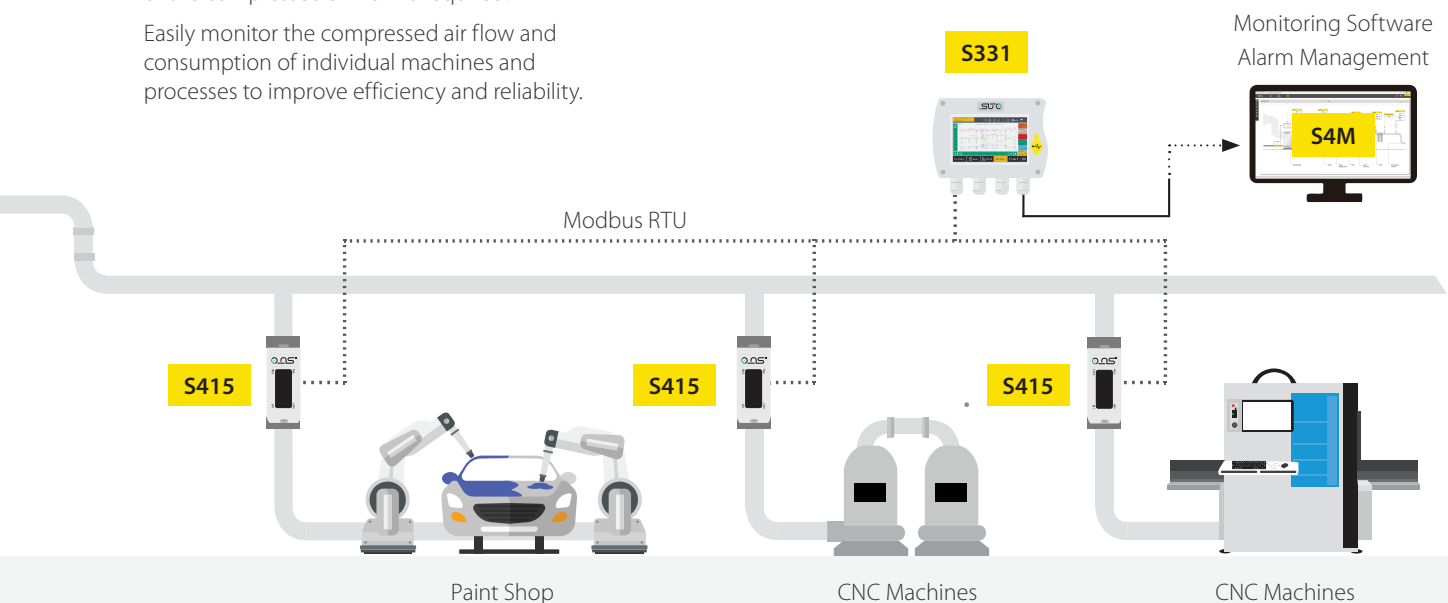

Various Output Signals

Output	Connector	Pin 1	Pin 2	Pin 3	Pin 4
Modbus/RTU	A	D-	-VB	+VB	D+
	B	D-	GND	NA	D+
Analog and Pulse	A	I-	-VB	+VB	I+
	B	I-	P	P	I+
M-Bus	A	M-bus	-VB	+VB	M-bus
	B	M-bus	NA	NA	M-bus
Wire colour		brown	white	blue	black

Pin assignment connector plug M8

- Every sensor includes 5m M8 cables with open ends
- Sensor with Modbus/RTU or M-Bus include 1 cable
- Sensors with Analog output include 2 cables

Wireless Connection

The free S4C-FS App offers a unique wireless connection to every SUTO flow meter for online readings and configuration.

Especially during installation and setup all settings can be performed using a smartphone, there is no need to carry a PC and an interface on site. This saves a lot of time and is the easy way to get reliable sensor readings.

Every sensor is protected by default. To perform changes on the flow meter, first a QR code must be scanned.

Flow Conditioner

Asymmetric velocity profiles, swirl, and other factors caused by bends in pipes can lead quickly to inaccurate readings. But sometimes there is not enough space to have straight inlet conditions for accurate readings.

The highly engineered flow conditioner solves this problem. Unlike a standard flow conditions disk, the 3D design of the flow conditioner allows measurements with no additional straight inlet piping at all. Thanks to the innovative mechanical design, the pressure loss is negligible small (<30 hPa), offering high accurate measurements in difficult pipe conditions.

Connect several S415 to Modbus Master

The S415 with Modbus/RTU interface can be easily daisy-chained to a Modbus Master device such as S331 by using RS-485 splitter (A554 3310) and the M8 to M12 converter cable (A553 0161). Through this method you can add up to 16 flow meters to the master device

Remark: The S331 can maximum provide 10 W power to the connected devices. If more power is required a separate power supply is needed..

Display Direction

Measuring Range in Air (l/min)

Range	Standard Configuration				
Process connection	DN8	DN15	DN20	DN25	DN32
Standard range (S)	250	1000	2000	3500	6000
Low range (L)	50	200	400	700	1200

Stated measuring ranges for S415 under following conditions:

- Standard flow in air in l/min
- Reference pressure: 1000 mbar
- Reference Temperature: +20 °C

Measuring ranges in Nitrogen are different. Please contact us for details at sales@suto-itec.com

Dimensions

Dimensions in mm	a	b	c	d	e

Ordering

Please use the following tables to assist in placing your order with our sales staff.

S415 Compact Thermal Mass Flow Meter (Inline)

Order No.	Description
S695 415	S415 Compact Thermal Mass Flow Meter, G inner thread, 24 VDC, 5 m cable with M8 connector and open ends included
Size	
S695 4150	DN8
S695 4151	DN15
S695 4152	DN20
S695 4153	DN25
S695 4154	DN32
Range	
A1464	Standard range version
A1453	Low range version
Output	
A1450	Analog 4 ... 20 mA, Pulse Output
A1451	Modbus/RTU output
A1452	M-Bus output
Gas type	
A1007	Air
A1010	N ₂
Units	
A1466	With SI units
A1458	With imperial units
Display direction	
A1462	Standard display direction (left to right)
A1460	Reverse display direction
Example:	S415 DN15, Standard Range, Modbus/RTU, Air, SI units, Standard Display direction
Order Code:	S695 4151.A1464.A1451.A1007.A1466.A1462

S415 Accessories

Order No.	Description
A554 0109	Mains power supply 100-240 VAC / 24 VDC, 0.5 A, 2 m cable with M8 connector
A553 0137	Connection cable to S551, 5 m
A553 0161	M8 to M12 converter cable for Modbus splitter
A553 0171	Cable to connect power bank, 1.8 m, USB-C connector for power bank, M8 connector
A554 3310	RS-485 / Modbus splitter

Mobile Power

S415 powered by power bank with connection cable A553 0171

Note: power bank must be sourced locally due to shipping restrictions [USB-C, 20 V, min. 100 mA]

S418

Compact Thermal Mass Flow Meter

Pro-Inline

SMARTPHONE ANDROID APP
For remote configuration

POINT-OF-USE MEASUREMENT
Monitor machines and air consumers

COMPACT DESIGN
Can be installed anywhere

TOTAL FLOW
No bypass measurement

EASY PROCESS MONITORING
Effective and inexpensive recording

ACCURATE RESULTS
Integrated flow conditioner

Benefits

- ✓ Highly versatile flow and consumption meter for compressed air and technical gases
- ✓ Integrated pressure sensor optional
- ✓ Integrated data logger for measurement recordings as standard feature
- ✓ Various process connection sizes available: DN8, DN15, DN20, DN25 and DN32 (G-inner-thread)
- ✓ Accurate monitoring of gas supplies and consumers
- ✓ Integrated flow conditioner eliminates the need of straight inlet sections

Powerful Pro Version – Flexible Installation

The S418 Thermal Mass Flow Meters offers compressed air flow and gas measurement directly at the point of use.

It comes standard with wireless communication interface to help the user quickly and easily check the flow meter readings or adjust the settings via the SUTO flow meter app.

Improve your compressed air system efficiency, while helping reduce compressed air and gas usage and operating costs by monitoring:

- Flow and Consumption
- Pressure
- Temperature

Connection

Pin assignment connector plug M8

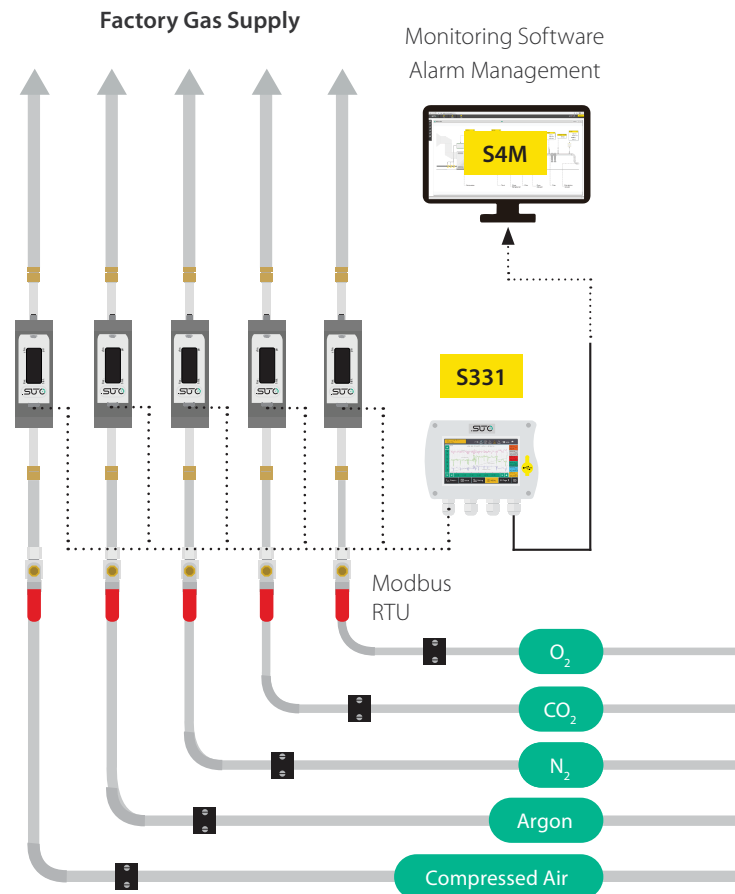

- Every sensor includes 5m M8 cables with open ends
- Sensor with Modbus/RTU or M-Bus include 1 cable
- Sensors with Analog output include 2 cables

Output	Connector	Pin 1	Pin 2	Pin 3	Pin 4
Modbus/RTU	A	D-	-VB	+VB	D+
	B	D-	GND	NA	D+
Analog and Pulse	A	I-	-VB	+VB	I+
	B	I-	P	P	I+
M-Bus	A	M-bus	-VB	+VB	M-bus
	B	M-bus	NA	NA	M-bus
Wire colour		brown	white	blue	black

Gas Monitoring Application

The S418 is ideal for remote locations or high accuracy compressed air flow and gas measurements with its built-in data logger and optional pressure sensing.

The compact flow meters provide accurate gas flow monitoring, helping to discover weak points in the process flow, thus ensuring continuity and profitability.

Wireless Connection

The free S4C-FS App offers a unique wireless connection to every SUTO flow meter for online readings and configuration.

Especially during installation and setup all settings can be performed using a smartphone, there is no need to carry a PC and an interface on site. This saves a lot of time and is the easy way to get reliable sensor readings.

Every sensor is protected by default. To perform changes on the flow meter, first a QR code must be scanned.

Flow Conditioner

Asymmetric velocity profiles, swirl, and other factors caused by bends in pipes can lead quickly to inaccurate readings. But sometimes there is not enough space to have straight inlet conditions for accurate readings.

The highly engineered flow conditioner solves this problem. Unlike a standard flow conditions disk, the 3D design of the flow conditioner allows measurements with no additional straight inlet piping at all. Thanks to the innovative mechanical design, the pressure loss is negligible small (<30 hPa), offering high accurate measurements in difficult pipe conditions.

Connect several S418 to Modbus Master

The S418 with Modbus/RTU interface can be easily daisy-chained to a Modbus Master device such as S331 by using RS-485 splitter (A554 3310) and the M8 to M12 converter cable (A553 0161). Through this method you can add up to 16 flow meters to the master.

Remark: The S331 can maximum provide 10 W power to the connected devices. If more power is required a separate power supply is needed..

Display Direction

Measuring Range in Air (l/min)

Range	Standard Configuration				
Process connection	DN8	DN15	DN20	DN25	DN32
Standard range (S)	250	1000	2000	3500	6000
Low range (L)	50	200	400	700	1200

Stated measuring ranges for S418 under following conditions:

- Standard flow in air in l/min
- Reference pressure: 1000 mbar
- Reference Temperature: +20 °C

S418-V

Compact Thermal Mass Flow Meter for Vacuum Applications

Pro-Inline

SMARTPHONE ANDROID APP
For remote configuration

POINT-OF-USE MEASUREMENT
Monitoring of vacuum pumps

COMPACT DESIGN
Can be installed anywhere

TOTAL FLOW
No bypass measurement

EASY PROCESS MONITORING
Effective and inexpensive recording

ACCURATE RESULTS
Integrated flow conditioner

Benefits

- ✔ Highly economical point-of-use flow and consumption measurements at the low pressure side of vacuum pumps
- ✔ Integrated data logger for measurement recordings as standard feature
- ✔ Various process connection sizes available: DN8, DN15, DN20 and DN25 (G-inner-thread)
- ✔ Absolute pressure sensor integrated for actual vacuum flow measurements
- ✔ Integrated flow conditioner eliminates the need of straight inlet sections
- ✔ Optional integrated pressure sensor

Optimize Your Vacuum System Efficiency

The S418-V Compact Thermal Mass Flow Meter offers a simple but effective monitoring solution for vacuum applications at the point-of use.

It comes standard with wireless communication interface to help the user quickly and easily check the flow meter readings or adjust the settings via the SUTO flow meter app.

Improve your vacuum system efficiency, while helping to reduce operating costs by monitoring:

- Flow and Consumption
- Pressure
- Temperature

Various Output Signals

Output	Connector	Pin 1	Pin 2	Pin 3	Pin 4
Modbus/ RTU	A	D-	-VB	+VB	D+
	B	D-	GND	NA	D+
Analog and Pulse	A	I-	-VB	+VB	I+
	B	I-	P	P	I+
M-Bus	A	M-bus	-VB	+VB	M-bus
	B	M-bus	NA	NA	M-bus
Wire colour		brown	white	blue	black

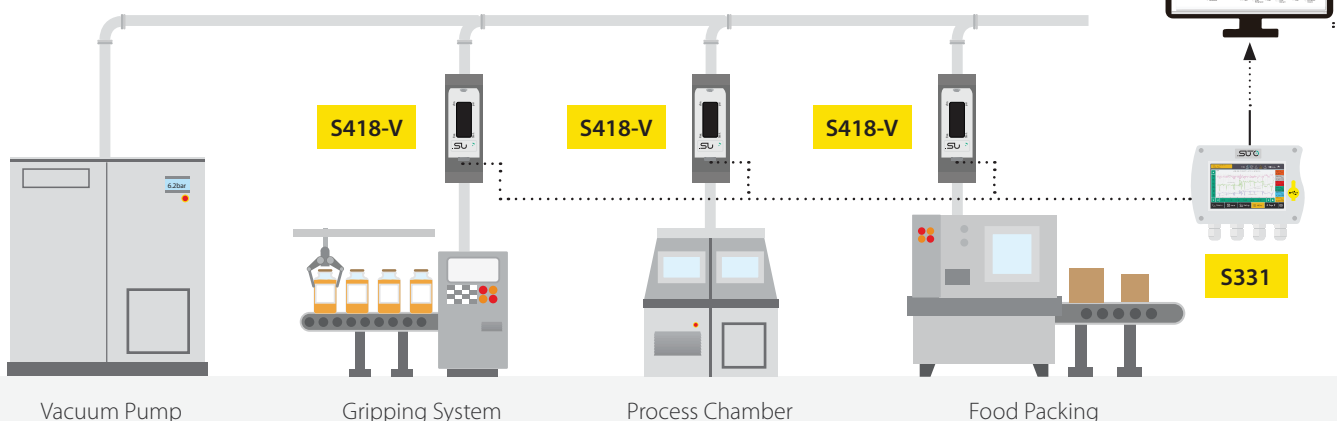

Pin assignment connector plug M8

- Every sensor includes 5m M8 cables with open ends
- Sensor with Modbus/RTU or M-Bus include 1 cable
- Sensors with Analog output include 2 cables

Vacuum Applications

S418-V is used for performance monitoring of vacuum pumps. Equipped with an absolute pressure sensor, it does not only show the vacuum pressure, but also shows the actual vacuum flow. These parameters are most the critical values in vacuum applications and help operators to ensure their process reliability.

Monitoring Software
Alarm Management

Wireless Connection

The free S4C-FS App offers a unique wireless connection to every SUTO flow meter for online readings and configuration.

Especially during installation and setup all settings can be performed using a smartphone, there is no need to carry a PC and an interface on site. This saves a lot of time and is the easy way to get reliable sensor readings.

Every sensor is protected by default. To perform changes on the flow meter, first a QR code must be scanned.

Flow Conditioner

Asymmetric velocity profiles, swirl, and other factors caused by bends in pipes can lead quickly to inaccurate readings. But sometimes there is not enough space to have straight inlet conditions for accurate readings.

The highly engineered flow conditioner solves this problem. Unlike a standard flow conditions disk, the 3D design of the flow conditioner allows measurements with no additional straight inlet piping at all. Thanks to the innovative mechanical design, the pressure loss is negligible small (<30 hPa), offering high accurate measurements in difficult pipe conditions.

Connect several S418-V to Modbus Master

The S418-V with Modbus/RTU interface can be easily daisy-chained to a Modbus Master device such as S331 by using RS-485 splitter (A554 3310) and the M8 to M12 converter cable (A553 0161). Through this method you can add up to 16 flow meters to the master

Remark: The S331 can maximum provide 10 W power to the connected devices. If more power is required a separate power supply is needed..

S450 / S452

Thermal Mass Flow Meter for Heavy Duty and Ex Applications

Insertion / Inline

S452

S450

INDUSTRIAL DESIGN
For outdoor applications

WIRELESS INTERFACE
User friendly sensor settings

NO MECHANICAL WEAR PARTS
Independent of pressure and temperature

EXPLOSION PROOF
Use in Ex-area applications

EASY TO CLEAN
All wetted parts stainless steel

ACCURATE RESULTS
Very fast response time

Benefits

- ✓ Robust metal enclosure suitable for outdoor applications in harsh environment
- ✓ All parts which come into contact with the measurement medium are made of stainless steel 316L
- ✓ No moving parts, non clogging
- ✓ Direct measurement of mass flow and standard flow without the need of pressure compensation
- ✓ Low maintenance costs due to stable and reliable measurements

1 Robust Materials

- The IP67 housing allows applications in harsh industrial environment as well as outdoor applications.
- All parts which come into contact with the measurement medium are made of stainless steel 316L. This makes the sensors robust and guarantees a reliable measurement.

2 Display

- The display shows all relevant measured values on site. This allows the user to install the flowmeter easily and quickly.
- The pressure-tight encapsulation protects the display from external influences and ensures that it is always clearly visible.

3 Flexible and easy Installation

Wide range of tube sizes are supported with insertion type for big pipe diameters and inline types for small pipe diameters.

4 Outputs

S450 and S452 offer different signal outputs for flexible installation. Analog 4 ... 20 mA 2/3-wire, pulse; Modbus/RTU; HART

Applications

- ✓ Flow measurement in hazardous and all wetter applications
- ✓ Explosive and harsh environments
- ✓ Pharmaceutical and food industry
- ✓ Various Gas Measurement such as oxygen, argon, carbon dioxide, natural gas, hydrogen, methane, etc..

Installation

S450

Insertion type installation through ball valve

S452

Inline type installation through flanges or R thread

Available Options

- ✓ Fieldbus interface: HART, M-Bus und Modbus/RTU
- ✓ Ex-Approvals:
 - IECEx
 - GB Ex
- ✓ Bi-directional measurement
- ✓ Flow conditioner for R-thread measuring sections

Rotation

Sensor head can be rotated in 90° steps through the screw nut. This allows the display to be turned into the best viewing position.

Industrial Communication

Industrial communication through Modbus/RTU, M-Bus, HART

R200 0005	Oil- & grease-free cleaned option for flow sensors (for Oxygen it is already included in A 1009)
A530 1106	High pressure installation device S450, 220 mm (to be used if pressure above 1.5 MPa)
A530 1113	High pressure installation device S450, 400 mm (to be used if pressure above 1.5 MPa)

S430

Pitot Tube Flow Meter for Wet Compressed Air

Insertion

PROCESS MONITORING

High accuracy and reliable measurements

WET AIR MEASUREMENT

Directly at the compressor outlet

COMPRESSOR EFFICIENCY

Constant monitoring of the compressor performance

MOBILE APP

For remote configuration and monitoring

EASY INSTALLATION

Under pressure through a ball valve

NO MECHANICAL WEAR PARTS

Stable results in high temperature applications

Benefits

- ✓ Accurate flow and consumption measurement in wet air or high mass flow and velocity applications based on the pitot tube principle
- ✓ Consistent and temperature stable compressed air flow monitoring at the outlet of the compressor
- ✓ Various output signals with connection to SUTO displays and/or third-party displays and PLCs
- ✓ Easy installation under pressure through ball valve
- ✓ High temperature applications up to 230 °C

1 Optional Color Display

On-site display for live value readings, total consumption counter and convenient sensor settings. Totalizer with 10 digits (1 999 999 999).

2 Various Outputs

The S430 pitot tube flow meter is perfectly suited to be integrated into process controls or high-level monitoring systems. Various output options are offered for a seamless integration:

- Isolated 4 ... 20 mA output for actual flow readings
- Isolated Pulse output for totalizer
- Modbus/RTU to read all values digitally
- Modbus/TCP
- M-BUs

3 Robust Materials

- IP65 casing provides robust protection in rough industrial environment
- All parts which come into contact with the measurement medium are made of stainless steel 316L. This makes the sensors robust and guarantees a reliable measurement.

4 Flexible and Easy Installation

- Tube diameters of 1.25" to 10" through center installation, bigger diameters through non-center installation
- Thanks to the insertion through a 3/4" ball valve, the S430 can be installed and under pressure and is perfectly suited for installations where shutdowns are not acceptable.

Configuration through smartphone app

S430

Compressed Air Treatment

Compressed Air Usage

S430 Installation and Sensor Removal

Installation through a ball valve

S430 Dimensions

Mobile App

Mobile Phone app for configuration and online readings. The app enable users to completely get rid of the inconvenience caused by cables, bulky PCs and hard-to-reach places.

Based on the pitot tube principle

The S430 is based on the pitot tube principle to measure flow. Properly installed (refer to instruction manual for details) the sensor can measure in wet and dirty gases as occurring, for example, at the discharge of a compressor.

Optional Color Display

Colour graphic display for online values and sensor settings

Connect several Flow Meters to Modbus Master

Flow meters can be easily integrated into a Modbus/RTU network (daisy chain)

Volumetric Flow Ranges

Tube		Volumetric Flow

12"	300	4462	46567	74.4	776	2626	27408

Stated measuring ranges under following conditions:

- Standard flow in air
- Reference pressure: 1000 hPa
- Reference Temperature: +20 °C

Flow range is calculated for Air at 6 bar(g), 50 °C and 90 % humidity.

Mobile Power

S430 powered by power bank with connection cable A553 0154.

Note: power bank must be sourced locally due to shipping restrictions [USB-C, 20 V, min. 100 mA]

A553 0105 Sensor cable, 10 m with M12 connector, open wires, AWG 24 (0.2 mm²)

A553 0154 Cable to connect power bank, 1.8 m, USB-C connector for power bank, M12 connector

Example: S430, 300 mm shaft, Air, bi-directional calibration, Modbus/RTU, display

Order Code: S695 4302.A1007.A1066.A1411.A1420

S409

Thermal Mass Flow Direction Switch

Insertion

**NO MECHANICAL
WEAR PARTS**
Robust Design

**FLOW
DIRECTION**
Reliable indication

**EASY
INSTALLATION**
Under pressure

RELAY OUTPUT
1 relay for each
direction

Benefits

- ✓ Accurate and fast detection of the flow direction
- ✓ Detects smallest changes < 0.1 m/s referred to 20 °C and 1000 hpa
- ✓ No mechanical wear parts for long term stable measurements
- ✓ Easy installation under pressure without stopping the operation

1 Robust Materials

IP65 casing provides robust protection in rough industrial environments to ensure reliable measurement results.

2 Flexible Installation

Through a 1/2"G-type ball valve the switch can be inserted into the pipe under pressure without shutting down the system.

3 Thermal Mass Flow Sensor

The thermal mass flow sensor element comes with main advantages:

- Very robust and completely of stainless steel
- Fast response times and wide measuring range at high accuracy
- Minimal pressure loss

4 Connection

Pin assignment connector

Pin arrangement of flow switch

	Pin1	Pin2	Pin3	Pin4	Pin5
A	SDI	-VB	+VB	DIR1	DIR1
B	SDI	-VB	+VB	DIR2	DIR2

Relay output at switch

Operation Principle

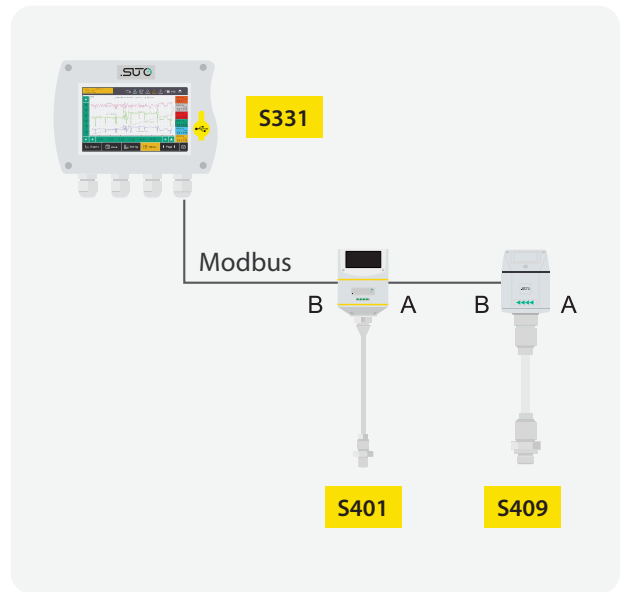

The thermal mass flow direction switch S409 allows the detection of direction of the flow. It can be used in compressed air and non-corrosive gases.

The flow and direction information is output through 2 normally open relay switches. The signals can be transferred to the SUTO flow sensor to activate and deactivate the flow measurement depending on the flow direction, as well as triggering which consumption counter is used.

Connection of S330 to S450 via flow switch

Connection of S330 to S401 with flow switch

Attention: Flow sensors S450 / S401 need to have the bi-directional calibration option to operate in both directions

S435

Vortex Flow Meter for Steam

Inline

INTERGRATED TEMPERATURE SENSOR

Automatic density
adjustment

EASY PROCESS MONITORING

Effective and
inexpensive
measurements

ACCURATE RESULTS

Very fast
response time

TOTAL FLOW

High accuracy
and reliable
measurements

LOCAL DISPLAY

For easy
configuration and
live values

Benefits

- ✔ Accurate saturated steam measurement by instant flow and consumption monitoring
- ✔ Integrated temperature sensor and small pressure loss
- ✔ High protection level due to robust industrial design and no moving parts
- ✔ Analog and Modbus output for data logging and analysis
- ✔ Wafer type makes it easy for installation

Accurate Steam Monitoring

Vortex flow meters are the ideal choice for steam measurements due to their robust design, without any moving parts and high temperature/pressure resistance.

S435 provides mass flow and consumption measurements in saturated steam with automatic density compensation. This always guarantees accurate results. Parameter settings can be done through the user interface (keys and display) at the flow meter directly. Connection to an SCADA system is through the Modbus/RTU interface or the analog output available.

Please ensure that the steam parameters such as temperature, pressure and nominal flow are within the specification of S435.

Installation

Use double bolts and nuts. We provide gaskets and bolts.

Dimensions

Vortex Flow Meter dimension rated pressure 1.6 MPa unit: mm

Integrated	LCD display
------------	-------------

Material

Process connection	Carbon steel /304/316/316L(Flange/Wafer)
Housing	SUS 304
Sensor	SUS 316
Metal parts	SUS 304

Miscellaneous

Electrical connection	1/2"-14NPT
Protection class	IP65
Process connection	wafer
Weight	depends on pipe size - please enquire if needed

Operating conditions

Medium	Saturated steam
Medium temperature	-40 ... +250 °C
Operating pressure	0 ... 1.6 MPa (applicable for option 2.5MPa or 4.0MPa)
Ambient temperature	-10 ... +60 °C
Ambient humidity	< 99 % rH
Storage temperature	-10 ... +60 °C
Transport temperature	-10 ... +60 °C
Pipe sizes	DN25 ... DN300

Measuring ranges

Saturated Steam Mass Flowrate (Unit: t/h)

S435 Vortex Flow Meter for Steam (Inline)

Order No.	Description
S695 4359	S435 Vortex Flow Meter DN40, wafer type
S695 4350	S435 Vortex Flow Meter DN50, wafer type
S695 4351	S435 Vortex Flow Meter DN65, wafer type
S695 4352	S435 Vortex Flow Meter DN80, wafer type
S695 4353	S435 Vortex Flow Meter DN100, wafer type
S695 4354	S435 Vortex Flow Meter DN125, wafer type
S695 4355	S435 Vortex Flow Meter DN150, wafer type
S695 4356	S435 Vortex Flow Meter DN200, wafer type
S695 4357	S435 Vortex Flow Meter DN250, wafer type
S695 4358	S435 Vortex Flow Meter DN300, wafer type
A695 0001	Blind pipe for uninstillation - DN40&DN50
A695 0002	Blind pipe for uninstillation - DN65
A695 0003	Blind pipe for uninstillation - DN80
A695 0004	Blind pipe for uninstillation - DN100
A695 0005	Blind pipe for uninstillation - DN125
A695 0006	Blind pipe for uninstillation - DN150
A695 0007	Blind pipe for uninstillation - DN200

Notes:

All Flow meters: Wafer connection (Companion flange, bolt and gasket included), temperature compensation, local display, medium temperature <250 °C, 4-20 mA signal output, 1/2-14 NPT electric connection, IP65, accuracy +1.5 %, 24 VCD, Modbus/RTU, Pulse, for saturated steam only

S461

Ultrasonic Flow Meter for Liquid

Clamp-on

NON-INVASIVE MEASUREMENT
Through clamp-on sensors

SMARTPHONE APP
Easy configuration

ENERGY METER
Monitors of heat exchangers

COMPACT DESIGN
Can be installed anywhere

LOCAL DISPLAY
For instant values

DATA LOGGER
8 million samples

EASY INSTALLATION
Various installation options

Benefits

- ✔ Measures the actual flow and total consumption of various liquids
- ✔ The configuration through the dedicated smartphone app is easy and most user friendly
- ✔ Connectable to any monitoring system, through various signal interfaces: Modbus/RTU (standard), 4 ... 20 mA / Pulse / Alarm-Relay (option), Modbus/TCP (option)
- ✔ Flow and consumption can be measured in both directions, forward and reverse (Bi-directional measurement)
- ✔ Robust industrial design with versatile installation options for the display unit: Wall installation, DIN rail and pipe installation
- ✔ Measurement log files can be downloaded through the free S4A software. Soon a wireless readout will be available through mobile App

Accurate Liquid Measurement

The SUTO ultrasonic clamp-on flow meter S461 has all it takes to measure reliable, easy and accurate flow and consumption of liquids. Based on the transit time technology this flow meter comes with unique features and outstanding performance.

The transducers are simply clamped onto the outside of the pipe and never come in contact with the fluid. The main unit is either installed onto the pipe as well, at the wall or onto a DIN rail.

The configuration and setup is made through the wireless smartphone app S4C-US which can be downloaded for free from the SUTO website, Google Play Store and the Apple App Store. The app allows the user to set up the device as well as reading live values, logger configuration and logger data read out.

By adding 2 clamp-on temperature sensors the Energy Meter Version monitors the efficiency of heat exchangers.

The S461 comes also as portable version in a transport case.

Transit Time Principle

T_F : time in flow direction
 T_R : time in reverse flow direction

A number of pulses are transmitted from one transducer to the other and vice-versa. Sound waves travel faster with the direction of flow and slower against the direction of flow.

Mobile App

Instant view of daily, weekly and monthly consumption through mobile app.

S461 and transducers mounted on pipe

Heat Recovery Principle

Principle heat recovery measurement with S461 Energy Meter

Heat exchangers transfer heat (energy) from a higher temperature medium (hot stream) to a colder one (heated stream). S461 measures the flow rate and the temperature difference between cold stream and heated stream. Based on these measurements the recovered energy will be calculated.

Convenient Storage

Transport casing holding up to 2 transducer pairs, T-Sensors, belt and metal stretchers, power bank, cables, charger and documentation

Accessories

Temperature sensor with metal stretcher

UTH-S transducer for higher temperature applications

Belt stretcher for temporary installation

Transducer mounting fixture simplify the flow transducer installation

Applications

- Cooling / Heating / Process Water
- Purified Water Measurement
- Fuel, Oils, Petroleum Products
- Water Treatment
- Food / Beverage
- HVAC / Energy System Audits
- Sanitary flow metering
- Hydraulic System Test
- Pharmaceutical Industry

Mobile Power

S461 powered by power bank with connection cable A553 0154

Note: power bank must be sourced locally due to shipping restrictions [USB-C, 20 V, min. 100 mA]

Ordering

Please use the following tables to assist in placing your order with our sales staff.

S461 Ultrasonic Flow Meter for Liquids (Clamp-On)

Order No. Description

D695 4610	S461 Ultrasonic Flow Meter for Liquids main unit, USB, data logger and display
D695 4611	S461 Ultrasonic Flow & Energy Meter for Liquids main unit, USB, data logger, display and 2 additional M8 temperature inputs

Main Unit Mounting Plate

A4603	Pipe/Wall mounting plate (for pipe mounting please order metal stretcher separately)
A4604	35 mm DIN rail mounting plate
A4602	No mounting

Output Options

A4605	Modbus/RTU
A4606	Modbus/RTU + 4 ... 20 mA, Pulse / Alarm
A4607	Modbus/RTU + Modbus/TCP

S461 Ultrasonic transducers for flow meter

S695 4610	UT-S, Ultrasonic transducer pair, DN40 ... DN1200, 5 m cable, M12 connector, 0 ... +80 °C, IP68 (includes coupling agent)
S695 4611	UTH-S, Ultrasonic transducer pair, DN40 ... DN1200, 5 m cable, M12 connector, -40 ... +130 °C, IP68 (includes coupling agent)

S461 Temperature Sensors for Energy Meter

S693 4610	Temperature sensor pair, 5 m cable, M8 connector -40 ... +130 °C, IP42, for S461 Energy Meter only (D695 4611)
-----------	--

Sensor Installation

	Metal stretcher for transducer and main unit installation on pipes
A695 4601	DN40 ... DN65 (2 pieces)
A695 4602	DN80 ... DN100 (2 pieces)
A695 4603	DN125 ... DN150 (2 pieces)
A695 4604	DN200 ... DN300 (2 pieces)
A695 4605	DN350 ... DN500 (2 pieces)
A695 4608	Belt stretcher for temporary sensor installations (portable unit), DN40 ... DN500 (2 pieces)

Example: S461 Flow Meter, No mounting, Modbus/RTU, UT-S transducer, DN80...DN100 stretcher

Order Code: D695 4610.A4602.A4605

S695 4610

A695 4602

Useful Accessories

Order No. Description

A553 0104	Sensor cable, 5 m, M12 connector, open wires, AWG 24 (0.2 mm ²)
A553 0105	Sensor cable, 10 m, M12 connector, open wires, AWG 24 (0.2 mm ²)
A554 0107	Mains unit 100 ... 240 VAC/24 VDC, 0.5 A for SUTO sensors, 1.5 m cable, M12 connector
A554 4625	Transport casing S461 dimensions: 560 x 450 x 160 mm (portable unit)
A553 0159	S461 flow transducer extension cable pair, 5 m, M12, 4-pole male/female
A553 0163	S461 temperature sensor extension cable pair, 5 m, M8, 4-pole male/female
A695 4610	Coupling agent for sensor installation, 65 g
A695 4617	Transducer mounting fixture for (UT-S) ultrasonic flow transducer pair
A695 4618	Transducer mounting fixture for (UTH-S) high-temperature ultrasonic flow transducer pair
A553 0154	Cable to connect power bank, 1.8 m, USB-C connector for power bank, M12 connector

Calibration & Services

Order No. Description

R200 4610	Calibration S461 together with transducer pair
R200 4613	Calibration temperature sensor S461

S462

Compact Ultrasonic Flow Meter for Liquids

Clamp-on

CLAMP ON
No contact to medium

TRANSIT TIME CORRELATION TECHNIQUE

PORTABLE
Connectable to S551

LOCAL DISPLAY
For easy configuration and live values

STATIONARY
Connectable to S330 / S331 series

COMPACT DESIGN
Can be installed anywhere

Benefits

- ✔ Clamp on type, very easy installation
- ✔ No moving parts
- ✔ Can be installed on stainless steel pipe, carbon steel pipe, copper pipe or plastic pipe such as (PVC, PVDF, PPR, PPH, HDPE, etc.)
- ✔ Clean fluid measurements: water, sea water, others on request
- ✔ Available pipe sizes: DN20, DN25, DN32, DN40

Time-efficient Liquid Measurement

The S462 ultrasonic clamp on flow meter for liquids uses the proven transit-time correlation technique. The unit is simply clamped onto the pipe and will never come in contact with the fluid.

Available in pipe sizes from DN20 ... DN40 the S462 impresses with ease of installation and accurate flow readings. It comes with Modbus/RTU interface and 4 ... 20 mA output, which makes it easy connectable to any facility monitoring system.

Of course S462 clamp on ultrasonic flow meter also works with the SUTO displays and data loggers S330/331 and S551.

Dimensions (Main Unit)

Dimensions (Mounting Bracket)

Model size	A (mm)	B (mm)	C (mm)	D (mm)	
				min	max
DN20	26.5	15	58	25	28
DN25	30	18	58	32	35
DN32	33	22.5	68	38	45
DN40	38	27	78	48	54

Easy Installation

Placing the couplant pads before installation to the downside part of the main unit

Easy clamp-on installation through mounting brackets

Vertical installation on a water pipe

S462 Compact Ultrasonic Flow Meter for Liquids (Clamp-On)

Order No. Description

S695 4621	S462 Clamp On Ultrasonic Flow Meter, DN20 , including 2m cable and 4 couplant pads
S695 4622	S462 Clamp On Ultrasonic Flow Meter, DN25 , including 2m cable and 4 couplant pads
S695 4623	S462 Clamp On Ultrasonic Flow Meter, DN32 , including 2m cable and 4 couplant pads
S695 4624	S462 Clamp On Ultrasonic Flow Meter, DN40 , including 2m cable and 4 couplant pads

Accessories

Order No. Description

A695 4620	Couplant pad, 4 pieces, 0 ... +80 °C
A554 0129	Transport casing S462 , can hold 4 units, battery pack, 2 m cable, 5 m cable, cal cert, IM, dimensions: 465 x 365 x 185 mm
A554 0107	Plug-in power supply, 100 ... 240 VAC / 24 VDC, 0.5 A , 2 m cable M12 connector. Recommended for portable unit
A553 0156	Cable to connect external power bank, 1.8 m, USB-C connector for power bank, M12 connector 90 degree for S462
R200 4620	Calibration S462
A4615	Sensor cable length extension (please inquire)
A554 3310	RS-485 splitter T, with 3 x M12 connectors to connect RS-485 devices to a bus

Portable set in transport casing. Can hold up to 4 units with battery pack, cables, charger and documentation

S462 powered by external power bank with connection cable A553 0156

Note: Power bank must be sourced locally due to shipping restrictions [USB-C, 20 V, min. 80 mA]

S211 / S215 / S220

Dew Point Transmitters

S211

-60 ... +20 °C Td

FOR DESICCANT DRYERS

S215

-20 ... +50 °C Td

FOR REFRIGERATION DRYERS

S220

-100 ... +20 °C Td

FOR HIGH-TECH APPLICATIONS

SIGNAL OUTPUT
4 ... 20 mA
Modbus/RTU

DISPLAY OPTION
For on-site values

COMPACT DESIGN
Makes it easy to fit into the application

PRESSURE SENSOR
integrated as option

AIR QUALITY
Monitors humidity

PRECISE MEASUREMENT
± 2 °C Td
Accuracy

Benefits

- ✓ Compact size makes them ideal for dryer installations
- ✓ Optional display for on-site values. Display can be rotated by 340° to fit your needs
- ✓ User friendly signal outputs to connect to process controls or monitoring systems
- ✓ IP65 casing provides robust protection
- ✓ Low maintenance costs due to stable and reliable measurements which increase calibration intervals
- ✓ Measured values available in several units: °C Td • g/m³ • mg/m³ • ppmv • g/kg (@ reference pressure) • % rH and more, please ask our support for other measurement units

1 Reliable Measurement

SUTO can rely on a 20+ years experience in developing dew point sensors used in compressed air systems and pressurized gases. During that period of time, the engineers have continued to develop new measurement methods and even developed own sensor elements for our innovative dew point meters.

2 Various Output Signal

The Dew Point Meters are perfectly suited to be integrated into process controls or high-level monitoring systems. Various output options are offered for a seamless integration:

- 4 ... 20 mA 2-wire + SDI
- 4 ... 20 mA 3-wire + SDI
- 4 ... 20 mA 3-wire + Modbus/ RTU

3 Robust Materials

The main body is made from high class aluminum alloy with a soft finish. The process connection is a 1.4301 (SUS 304) stainless steel connection, made to last forever.

Top cover made from aluminum at the same quality as the main body. The optional display cover is made from robust Polycarbonate with ABS reinforcement to withstand the rough environment.

4 Display Option

The OLED display directly mounted on the device provides on-site real time values. The display can be easily rotated by 340° to fit your application.

5 S220 with unique QCM Sensor

Our QCM sensor is the result of years of high-tech research and development. The sensor was especially designed for low dew point applications where other sensor types fail.

The combination of QCM and the well known Polymer sensor makes the S220 the worlds first model to measure accurate over the whole range, from -100 °C Td up to +20 °C Td by switching automatically between the two sensor elements as needed.

Measurement Ranges and Applications

Model	S211	S215	S220
Dew point	-60 ... +20 °C Td	-20 ... +50 °C Td	-100 ... +20 °C Td
Temperature	-30 ... +70 °C	-30 ... +70 °C	-30 ... +70 °C
Pressure	0 ... 1.6 MPa	0 ... 1.6 MPa	0 ... 1.6 MPa
Application	In desiccant dryers	In fridge dryers	In high tech requirements and conditions

Modbus Sensor Network with S331

The Modbus/RTU bus allows to connect several devices to a single bus line via Daisy-Chain. For example up to 16 devices to a S331. The S331 is a very powerful yet cost effective new data logger and display solution.

Dimensions

Exchange Service

No Downtime anymore!

The exchange calibration service eliminates down time and enables users to have a seamless record of their dew point measurements.

The user receives in advance a calibrated instrument with calibration certificate and the same instrument settings. The onsite instrument is then switched against the calibrated one and returned to the supplier.

SUTO | Exchange Service

S220 with unique triple sensor solution

With the S220, SUTO is combining three sensors into a single measurement unit, making it unique and the most advanced sensor available on the market, with a full range of -100 ... +20 °C Td.

Operating conditions	Medium Temp.: -30 ... +70 °C / Ambient Temp.: 0 ... +50 °C / Ambient Humidity: 0 ... 100 % rH		
Materials	Casing: Aluminum alloy / Process thread: Stainless steel 1.4301 (SUS 304) / Display cover: PC + ABS		
Classification / Approval	IP65 / CE		
Sensor protection	Sinter filter (stainless steel)		
Transport & Storage	Transport Temperature: -30 ... + 70 °C / Storage Temperature: -20 ... + 50 °C		
Weight	180 g		
Measured gases (Medium)	Air, Argon, O ₂ , N ₂ , CO ₂ *		
Output Signal	4 ... 20 mA 2-wire + SDI, 4 ... 20 mA 3-wire + SDI, 4 ... 20 mA 3-wire + Modbus/RTU		
Sensor types	Temperature sensor: Pt100 / Pressure sensor: Piezo resistive type		
Display option	0.66" OLED display, indicates the measured value and unit		
Supply Voltage	15 ... 30 VDC		

* CO₂ medium:

If the S211 is used in CO₂ the range is limited to -40 °C Td

The S211 and S220 must be set to CO₂ ex works or by using the S4C-DP Service Software + Service Kit (please state at the order if S211 and S220 will be used in CO₂)

Accessories

Measuring chamber for easy installation through quick coupling

By-pass measuring chamber with 6 mm hose connections as in- and outlet

High pressure measuring chamber for applications up to 35.0 MPa

M12 Sensor cable with open ends 5 m or 10 m

Ordering

*¹ A1381: The high pressure option is only available for the models S215 and S211. The S220 can not be used in pressure applications > 1.6 MPa

*² N/A: This option is not available for these models

*³ Standard Modbus/RTU Settings are Slave Address: last two digits of serial number / Com. Settings: 19200 baud, 8/N/1

Order Example

Model:	S211 -60...+20 °C Td, 3-wire analog & Modbus/RTU, 0...1.6 Mpa operating pressure, without display
Code:	S699 3211.A1380.A1389

Output Unit

The dew point Transmitter is available with different measurement units for dew point, humidity, temperature and pressure. Standard is: **Dew point = °C Td / Temperature = °C / Pressure = bar**
If you would like to have a different unit as output, please specify it at the order or use the optional Service Kit with the Service Software to change the output unit. For example pressure in PSI or humidity in ppmv.

Accessories

Order No.	Description
A699 3491	Measuring chamber with quick connector, up to 1.6 MPa, 2 l/min purge @ 0.8 MPa
A699 3493	Measuring chamber by-pass, up to 1.6 MPa, 6 mm hose connection as in- and outlet
A699 3590	High pressure measuring chamber, up to 35.0 MPa, G 1/4" inner thread process connection
A553 0104	Sensor cable, 5 m with M12 connector, open wires, AWG 24 (0.2 mm ²)
A553 0105	Sensor cable, 10 m with M12 connector, open wires, AWG 24 (0.2 mm ²)

Calibration

Order No.	Description
R699 3396	Re-calibration dew point transmitter, incl. certificate of calibration

S230 / S231

Dew Point Transmitters for Ex Applications

S230

-100 ... +20 °C Td

S231

-50 ... +20 °C Td

EX APPROVED
IECEX, ATEX &
GB Ex

PRECISE MEASUREMENT
Unique QCM
sensor technology

LOW DEW POINT
Measures down
to -100 °C Td

DUAL SENSOR SYSTEM
High precision
over the whole range

Benefits

- ✔ Dew Point Transmitter made for Ex-Applications (IECEX, ATEX, GB Ex)
- ✔ Robust enclosure for the use rough industrial environments
- ✔ Dual sensor technology for the highest accuracy over the full range of -100 ... +20 °C Td
- ✔ G1/2" Stainless steel process connection
- ✔ 4 ... 20 mA analog and Modbus/RTU digital outputs for highest flexibility

Reliable dew point monitoring

The S230 / S231 dew point sensor from SUTO offers reliable and customer-oriented measurement technology in a robust housing. The sensor is used in harsh industrial environments and, thanks to the compact housing, offers easy integration into existing processes.

The unique dual sensor system combines two measurement methods in one sensor. The sensor offers highest precision and accurate measurement results over the entire measuring range. The intelligent measurement technology automatically selects the appropriate measurement method, thus ensuring the reliability of the measurement results.

The S230 / S231 is preset at the factory and is ready for immediate use. The output signals available are an analog 4 ... 20 mA signal and a digital Modbus/RTU signal. We will be pleased to set the parameters to suit your application. Alternatively, you have full access to all settings via the service kit.

Accessories

Measuring chamber with inlet / outlet valve and compression fitting for gas supply

Cable connection

Screw terminals with signal labels inside the connection chamber

A1481	Ex option IECEx
A1482	Ex option GB3836

Accessories

Order No.	Description
A554 2301	Measuring chamber with inlet / outlet valve and compression fittings for gas supply, 1.6 MPa
A554 2302	Measuring chamber with insertion type sampling tubes (for applications where purge losses are not acceptable), 1.6 MPa
A699 3491	Measuring chamber with quick connector, up to 1.5 MPa, 2 l/min purge @ 0.8 MPa
A699 3493	Measuring chamber by-pass, up to 1.5 MPa, 6 mm hose connection as in- and outlet

S305

Dew Point Monitor

Opt. 1

-50 ... +20 °C Td

Opt. 2

-20 ... +50 °C Td

PLUG & PLAY

Simply connect your compressed air

DEW POINT MEASUREMENT

-50 ... +50°C Td depending on the model

PRECISE MEASUREMENT

± 2°C Td accuracy

ALARM INDICATION

With internal relays or alarm units

Benefits

- ✓ Plug & Play solution, no need for complicated setup and installation
- ✓ 6 mm hose connection with quick coupling for most convenient installation
- ✓ Two ranges available:
 - 20 ... +50 °C Td for fridge driers
 - 50 ... +20 °C Td for desiccant driers
- ✓ Wall mountable housing with a big display and optional alarm unit
- ✓ 4 ... 20 mA output to connect it to a PLC or BMS system
- ✓ Easy alarms set up for pre- and main alarm

Refrigeration dryers are the most commonly used dryer type in compressed air system around the world. If the required drying is not achieved, the impact of wet air can be serious: Rust in the pipes, failures of machines, and a negative impact on product quality.

SUTO offers with the S305 a measuring device for dew point monitoring that kicks in alarm indications when drying values are not within the desired range.

2 Models

-50 ... +20 °C Td and -20 ... +50 °C Td

1 Dew Point Sensor

Reliable polymer dew point sensor with integrated measuring chamber for accurate readings and fast response time

2 Robobust Casing

The entire measuring unit is integrated together with the display in a rugged housing (IP65)

3 Power Supply

100 ... 240 VAC or 24 VDC

4 Output

4 ... 20 mA output to PLC or SCADA system

5 Connection

The connection to the compressed air network is via a 6-mm quick connect and corresponding connecting hose.

Dimensions

Pre- and Main-Alarm programmable

Two alarm levels can be programmed (pre and main alarm), serving an optical indications or separate relay outputs.

Exchange Service

No Downtime anymore!

The exchange calibration service eliminates down time and enables users to have a seamless record of their dew point measurements.

The user receives in advance a calibrated sensor unit with calibration certificate and the same sensor settings. The onsite sensor is then switched against the calibrated one and returned to the supplier.

SUTO | Exchange Service

Installation

S305 is designed to be Plug & Play. There is no need for complicated setup or configuration. Simply connect your compressed air and start measuring.

Optional Alarm Unit

Wall mounted housing with a big display for dew point, temperature and humidity. The optional alarm unit can be wall mounted or mounted directly on the housing. The 360° visible LED and the alarm buzzer indicate alarms reliably.

Benefits

- ✓ Easy to use portable meter to measure dew point, temperature and pressure on site
- ✓ Sensor selection according to your needs (-100 ... +20 °C Td with pressure sensor / -50 ... +50 °C Td version)
- ✓ ISO 8573 class measurements with powerful ISO 8573-1 PDF reporting function
- ✓ Wireless printer for on-site reporting to easily perform audits
- ✓ Unique Measuring chamber with parking function supports fast response times
- ✓ Optional smart features: End value prediction, camera and measurement snapshot

1 Dew Point Value Prediction

The S520 offers a unique dew point end value prediction algorithm as a built-in technology.

Based on the dew point measurement curve our algorithm is able to predict the end value before actually reaching the end value.

This feature enables the user to predict the dew point end value in a minimum amount of time. It helps on-site engineers to save time and to perform faster dew point audits.

Smart Features

Dew point end value prediction is a part of the smart features. With the smart features option, users also get a 5 Megapixel camera and the snapshot function for quick measurement logging.

2 Measurement Snapshot

Take a quick measurement snapshot of the current measurement, add the customer information and easily create a printed report.

All can be done on the device via touchscreen input.

3 Measurement Chamber

The unique measuring chamber with integrated parking function enables users time efficient dew point measurements.

When the instrument is not used, the measuring chamber can be set to parking position. In this state, the sensor is exposed to a desiccant, which keeps the sensor well protected and dry.

When starting the next measurement, the sensor is pre-dried and has therefore an ultra-fast response time, perfect for air audits.

4 Unique SUTO Triple-Sensor

S520 is equipped with the SUTO QCM, the Polymer and an integrated Pressure sensor.

Our QCM sensor is the result of years of high-tech research and development. The sensor was especially designed for low dew point applications where other sensor types fail.

The combination of QCM and the well known Polymer sensor makes the S520 measure accurate over the whole range, from -100 °C Td up to +20 °C Td by switching automatically between the two sensor elements as needed. At the same time the line pressure is measured.

Application: Compressed Air Quality Monitoring On Site

The S520 Portable Dew Point Meter enables more accurate and frequent quality monitoring to operators. Throughout any given day, plant personnel can check the dew point throughout their system, using the S520's detailed metrics and portability to gather useful information from even the least accessible corners of their system.

With the S520, operators can make sure that their compressed air treatment system (air dryers, filters, and drains) is functioning at its absolute peak. If the S520 reveals heightened moisture levels at any point during the routine check, personnel can quickly locate and resolve the issue, reducing instances of clogged filters and dryer problems.

Optional Printer

Wireless printer used to print the measurement results on site. Perfect solution for quick audits.

Exchange Service

No Downtime anymore!

The exchange calibration service eliminates down time and enables users to have a seamless record of their dew point measurements.

The user receives in advance a calibrated instrument with calibration certificate and the same instrument settings. The onsite instrument is then switched against the calibrated one and returned to the supplier.

SUTO | Exchange Service

PDF Report Function according to ISO 8573-1

Create powerful PDF Reports on-site according to the ISO 8573-1 standard.

The reports are following the recommendations stated in the ISO 8573-1, additionally customer related data as well as service provider details can be entered on-screen, making it even easier to perform audits and to create meaningful reports.

PDF reports can be created from any recordings on the device and are copied on the fly to a connected USB drive.

The declared Pressure dew point in °C is stated as the measured dew point under actual conditions as well as referring to reference conditions at 20 °C/7 bar(g), as it is required by ISO 8573-1 standard. This is only possible, thanks to the integrated pressure sensor on the S520.

DATA LOGGER
100 million values

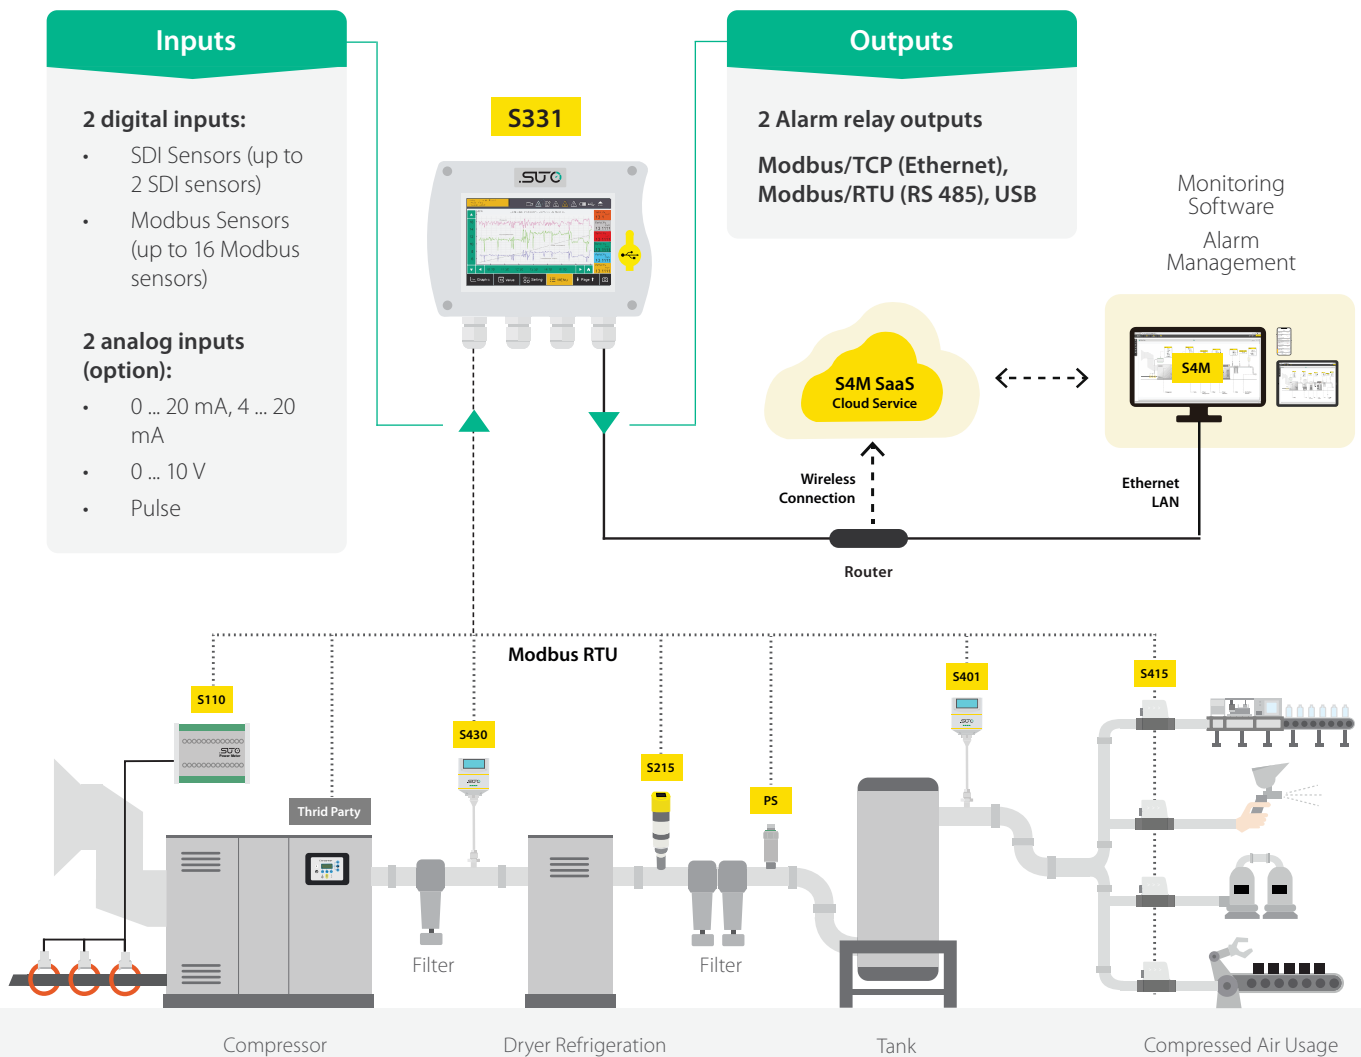

Benefits

- ✔ Central unit of a compressed air monitoring system, collecting, recording and visualizing all measurement data
- ✔ High-resolution 5" color touch screen for easy operation and on-site data visualization
- ✔ Connect up to 16 Modbus/RTU sensors, 2 analog sensors and 2 SDI sensors to a single data logger
- ✔ Modbus/RTU and Modbus/TCP output always included for a seamless integration into existing monitoring and building management systems
- ✔ Alarm monitoring for all measurement channels with on-screen indication and 2 relay outputs

Plug and Play Data Logging – Process Visualization and Analysis

The S330/S331 Display and Data Logger provides an universal solution for displaying and recording all relevant parameter of a compressed air system, which includes flow, dew point, pressure, temperature, power consumption, compressor status, and so on. The devices offer a powerful yet cost efficient data logger and display solution for optimal and reliable management and monitoring of your compressed air system.

Applications

The S331 Display and Data Logger is used to gather and collect measurement data of various field devices. It acts as the central unit where all measurement data is safely stored and visualized. The digital communication outputs are not making it a display and data logger, but also a gateway to connect to IIoT services, as well as to connect it to modern software solutions

Available Installation Options

2 different wall mountable casings to fit customers needs.

The Display can be installed in existing wall cabinets or machines via panel mounting options.

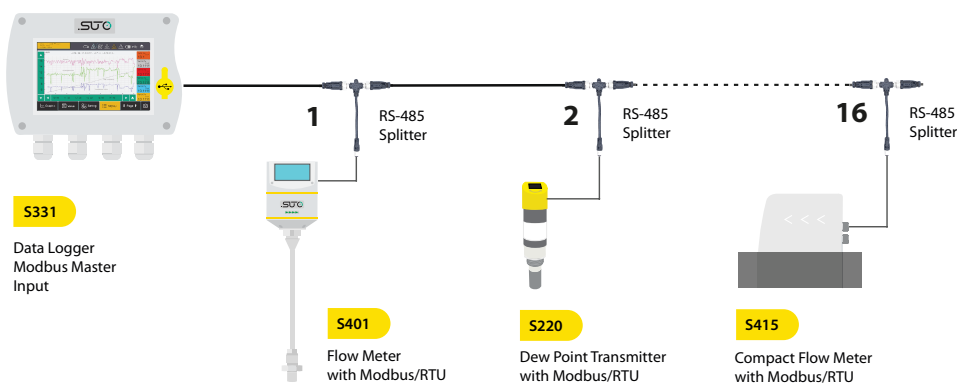

The DIN rail option is used to install the Display inside of electrical cabinets.

1 SUTO Modbus/RTU Sensor Input

The S330 / S331 includes digital inputs for SUTO SDI sensors and Modbus/RTU sensors. To connect the Modbus/RTU sensors properly on an RS 485 bus system, it's recommended to daisy-chain the sensors to one of the inputs. For this purpose, SUTO offers a RS 485 splitter to simplify the connection.

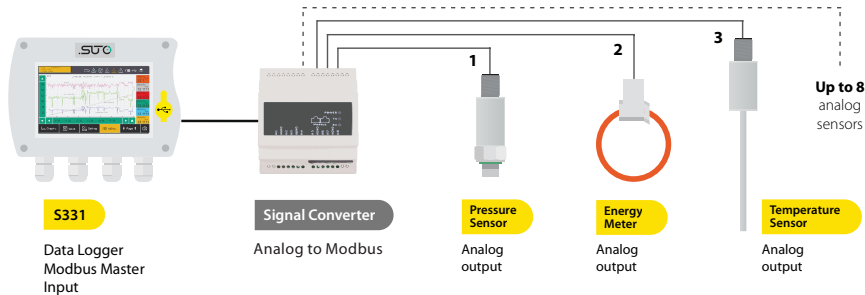

Through this method, users can add up to 16 sensors to the master input, making it most versatile and allowing to monitor whole plants with a single data logger. (Additional power supplies for field devices might be necessary)

2 Analog Sensor Input

The S330 / S331 can be equipped with an analog input option, allowing to connect 0/4... 20 mA, 0...10 V and pulse signals from field sensors. If more analog sensors need to be connected, a Analog-Modbus/RTU converter module can be easily connected, allowing to connect additionally 8 analog sensors.

This makes the S330 / S331 most versatile and offers the possibility to connect existing field hardware and sensors seamlessly into the monitoring system.

3 Third-Party Sensor and Field Device Support

By relying on the industry standard protocol Modbus/RTU, the S330 / S331 does support third-party sensors to be easily integrated into the monitoring system. Field devices can be easily set up using the configuration software, allowing to add third-party sensor within seconds.

Of course, all connected sensor data can be logged to the internal memory, used for virtual channel calculations and real-time values are forwarded to connected software and monitoring solutions.

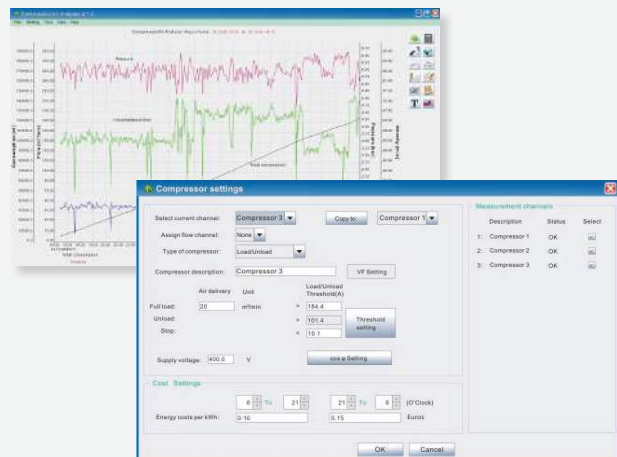

Data Analysis

Through the free SUTO S4A software recordings are downloaded to the PC via USB, LAN or wirelessly using the LTE/4G Modem. The basic analysis can be done in S4M.

For more sophisticated compressor analysis, the SUTO CAA software (incl. in S551) offers many advanced features such as:

- Performance statistics of compressors (efficiency, air delivery, load/unload cycles)
- Leakage analysis
- Report generation
- and more...

Comparisons with baseline measurements from last year or last month help to identify system changes.

User Friendly Handling

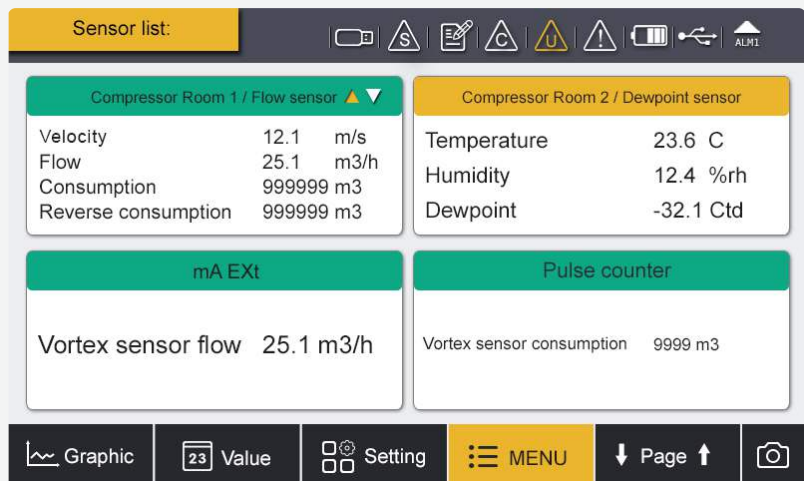

The S330 / S331 comes with a high resolution 5" color touch screen interface making the operation as simple as possible.

Sensor Data Overview

Up to 4 sensors can be viewed on one page and through page scrolling further sensors can be displayed.

This makes it easy to monitor different sensors at the same time.

Graphic Charts for Quick Analysis

Select which channels you want to view or analyze and the built in graphic analyzer will help you identify problems immediately.

For detailed analysis we recommend using SUTO S4M software.

Technical Data

Signal / Interface & Supply

Data logger

Storage	Internal, up to 100 million values
Sampling rate	Optional $\geq 1s$, Max 59mm:59ss

Input signals

Digital input	2 x SDI sensors 16 x RS-485 Modbus RTU Sensors 2 x 0 ... 20 mA / 4 ... 20 mA / 0 ... 10 V

Ordering

Please use the following tables to assist in placing your order with our sales staff.

S330 / S331 Display and Data Logger

Order No. Description

D500 0333	S330 Display, Panel Version, 2 x SDI & 16 x Modbus/RTU input, Ethernet, RS 485, USB
D500 0331	S331 Display and Data Logger, Panel Version, 2 x SDI & 16 x Modbus/RTU input, Ethernet, RS 485, USB

Analog input

A1672	None
A1662	2 analog inputs 0/4 ... 20 mA, 0 ... 10 V + 2 pulse inputs

Power supply (must choose one option)

A1663	Power supply input 100 ... 240 VAC, 20 VA, with 2 Alarm relays
A1664	Power supply input 18... 30 VDC, 20 W, with 2 Alarm relays

Wall casing

A1673	None, Panel mounting
A1665	Wall mountable casing with 4 cable glands
A1666	Wall mountable casing with 7 cable glands
A1667	Wall mountable casing with 3 cable glands + Ethernet
A1668	Wall mountable casing with 6 cable glands + Ethernet

Hat rail

A1674	None
A1669	Hat rail holder (only in connection with wall mountable casing)

Accessories

Order No. Description

Cables

C219 0055	M12 connector with RS-485 termination resistor, 120 Ω , for Modbus daisy chain termination
A554 3310	M12 RS-485 (Modbus) splitter
A553 0130	USB cable for S330 / S331 (1 cable included in S330 / S331)
A553 0104	Sensor cable 5 m, with M12 connector, open wires, AWG 24 (0.2 mm ²)
A553 0105	Sensor cable 10 m, with M12 connector, open wires, AWG 24 (0.2 mm ²)
A553 0106	Power cable with mains plug, 1.8 m
A553 0120	Ethernet cable 5 m, RJ45 plug at both ends

Converters and gateways (Please contact our customer service for further converter/gateway options)

A554 0011	RS-485 repeater
A554 0331	RS-485 / USB converter

Software

M599 2031	S4M, data acquisition and analyzes software
A1102	Add-on Energy Manager for S4M

Others

D554 0031	8-channel current input module, 0 ... 20 mA, Modbus/RTU
A554 0007	Power supply wall mountable
A554 0009	Power supply for hat rail
A554 3311	Line filter for EMC protection
A554 3313	Connection board for looping 4 ... 20 mA and pulse signals to PLC, mountable in wall casing A1666 or A1668

S320

Display

EASY TO USE
User-friendly design

POWER SUPPLY
Flexible power supply

ALARM
Optional alarm settings

USB INTERFACE
For configuration with S4C software

EASY INSTALLATION
Wall or panel mountable casing

SIGNAL INPUTS
Digital and analog input

Benefits

- ✓ Cost-efficient display unit for live readings on a big display
- ✓ Inputs for sensor connection:
 - 1 input for flow / dew point sensor
 - 1 input for analog sensors
- ✓ 2 relay outputs for alarm with optional alarm on display
- ✓ USB interface for configuration with S4C software
- ✓ Wall or panel mountable casing

Display Solutions for Sensors

The S320 Display provides a cost efficient display solution for industrial applications where information from a single difficult-to-access sensor is required. The display has an input for SUTO flow meters and dew point sensors.

It can display all relevant parameters (flow, dew point, pressure, temperature, power consumption, compressor status etc.) in a compressed air system.

Dimensions

Inputs

- 1 input for SUTO flow/ dew point sensors
- 1 input for analog sensor (0 ... 20 mA, 0 ... 10V)

Outputs

- Communication Interfaces USB port
- Other Signals / Features
- 2 Alarm relay outputs

Technical Data

Signal / Interface & Supply

Input signals

Digital input	1 x SDI for dew point and flow sensors
Analog input	1 x 0 ... 20 mA or 1 x 4 ... 20 mA or
Pulse input	1 x 0 ... 10 V

Output signals

Alarm output	2 relays, 230 VAC, 3 A
--------------	------------------------

Electrical data

	100 ... 240 VAC, 15 VA (option A1640)
Power supply	18 ... 30 VDC, 15 VA (option A1641)
Sensor supply	24 V, 10 W

Data interface

Connection	USB to PC
Operation	Keyboard, 4 keys

General data

SDI or Modbus-based
SUTO sensors

**VERSATILE
CONNECTION**
Up to 24 sensors
inputs

**LTE / 4G
MODEM**
Access from
world wide

**TOUCH
SCREEN**
5" large color LCD

**TIGHT
PROTECTION**
IP65

**BACK-UP
POWER**
Battery as
back-up power

Benefits

- ✓ Easy to use and cost-effective data logging solution at the point of use.
- ✓ S4A software for data analysis and remote connection via 4G / LTE Modem
- ✓ Connectable sensors for all required measurement tasks
- ✓ Up to 24 inputs through extension boxes and Modbus
- ✓ Third-party sensors can be easily connected

On site Logging

- Ultra portable and robust design to perform measurement tasks and audits on site
- High resolution 5" color touch screen interface, making the operation as simple as possible.
- Back up battery ensures continuous measurement and prevents data loss during power glitches and cuts.

Plug & Play

- With a few settings, the data logger is ready for operations with virtually unlimited memory size.
- No time consuming configuration and programming is required. Just connect the sensor and start the recording.

Optional Remote Connection

- Integrated USB port for 4G dongle connection outside the casing.
- Can be easily connected to the S4A Software and monitored remotely, no longer dependent on a Wi-Fi connection.

Wireless Connection

Compressor Efficiency Test

Knowing your Compressor Efficiency is the first step for your energy saving requirements

Applications

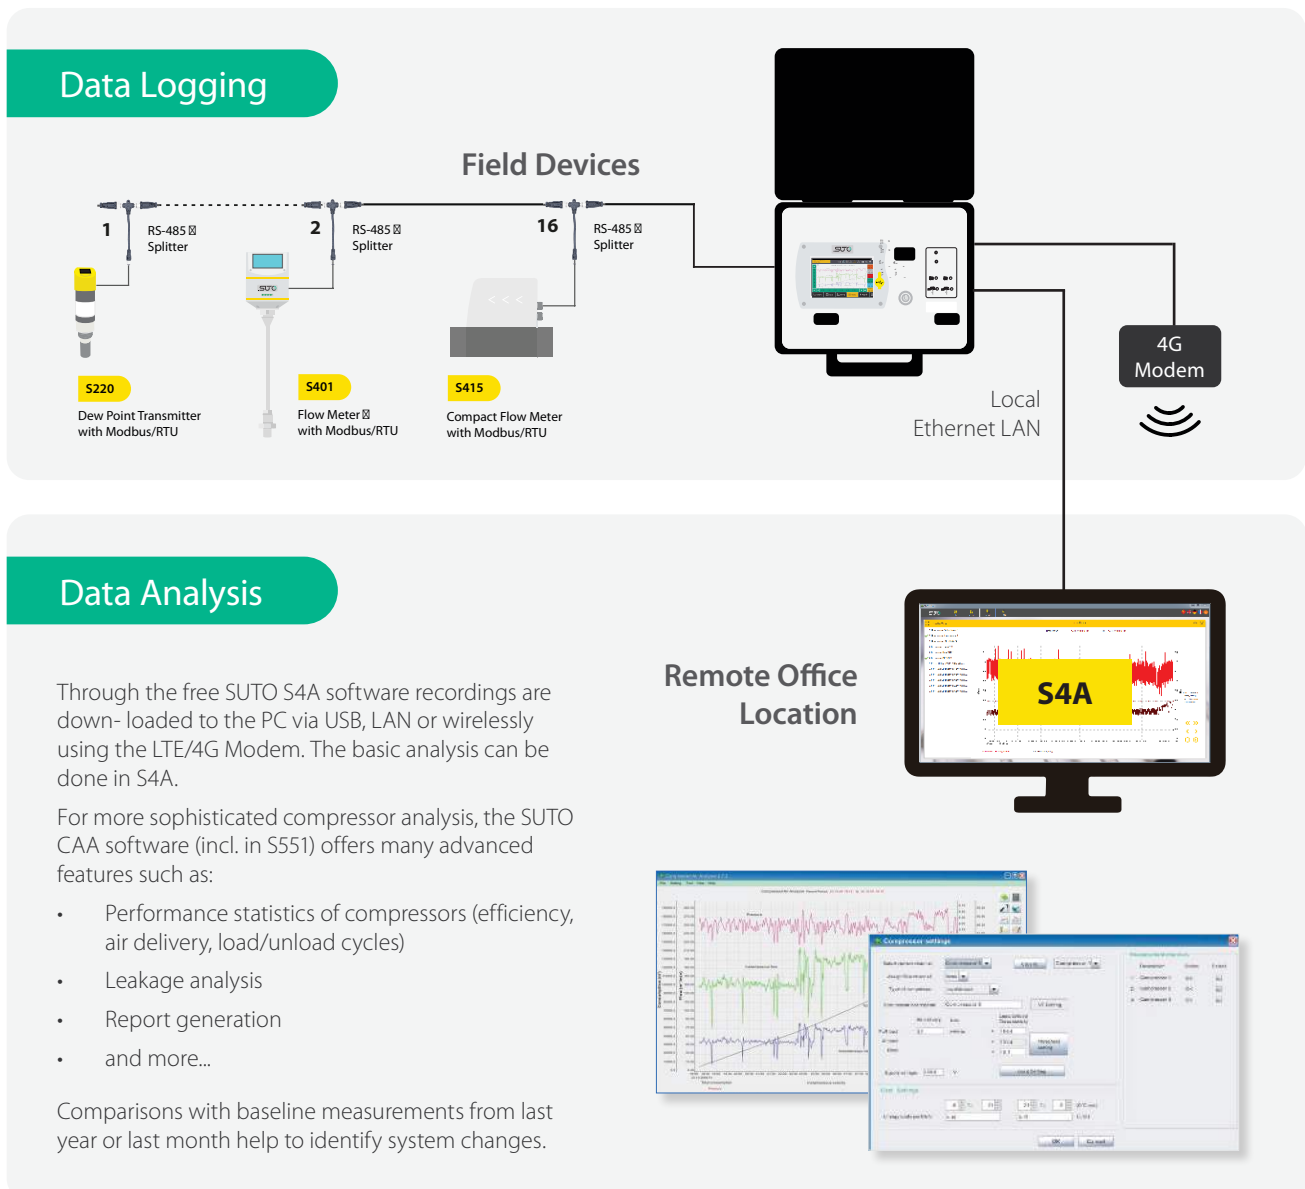

The S551 Portable Display and Data Logger is the perfect tool for compressed air service engineers as well as compressed air experts.

Due to its compact design and the integrated battery, on-site measurements are carried out most efficient user friendly. From simple dew point spot check up to identifying insufficient compressor systems, the S551 is the tool to make these measurements.

Remote Data Analysis

The S551 is capable of sending measurement data and status information to a remote server through the Internet. This allows users to monitor the system remotely. The illustration below shows the principle setup.

Versatile Connections and Sensor Inputs

- Connectable sensors for all required measurement tasks (air flow, air consumption, power consumption, pressure, temperature and many more)
- Up to 24 inputs through extension boxes and Modbus
- Third-party sensors can be easily connected

Industrial quick connectors allow a plug & play setup and ensure a reliable sensor connection.

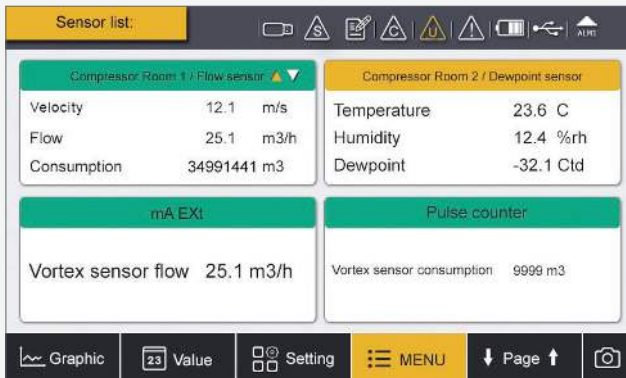

Industrial Ethernet Port for LAN connections

User Friendly Interface

The S551 comes with a high resolution 5" color touch screen interface making the operation as simple as possible.

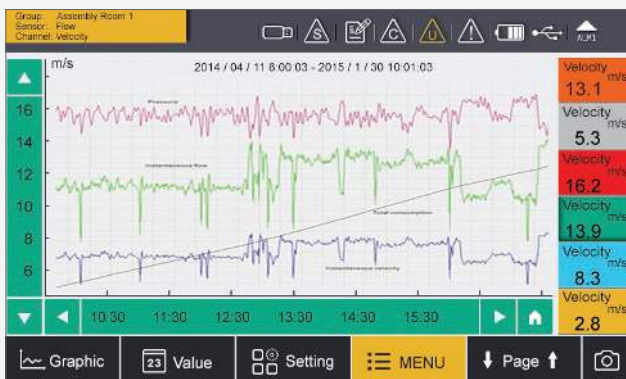

SUTO intelligent sensors are detected automatically on power-up. With a few settings the data logger is ready for operations with virtually unlimited memory size.

Sensor Data Overview

Up to 4 sensors can be viewed on one page and through page scrolling further sensors can be displayed.

This makes it easy to monitor different sensors at the same time.

Graphic Charts for Quick Analysis

Select which channels you want to view or analyze and the built in graphic analyzer will help you identify problems immediately.

For detailed analysis we recommend using SUTO software S4A, CAA or S4M.

Technical Data

Signal / Interface & Supply

Data logger

Storage	4 GB, up to 100 million values
Sampling rate	The minimum time interval is 1 second

Digital input

Interface	2 x SDI connectors, 2 x Modbus/RTU connectors
Update rate	Value updated every 1 sec
No. of connectable Sensors	2 x SDI sensors 16 x Modbus/RTU sensor

Analog input

Signal	Analog (0 ... 20 mA, 4 ... 20 mA, 0 ... 1 V, 0 ... 10 V), Pulse
Burden	max. 250 Ohm
Update rate	Value updated every 1 sec

Fieldbus output

Protocol	Modbus/RTU, Modbus/TCP
Update rate	Value updated every 1 sec

Other outputs

Communication Interface	4G/LTE (optional)
Purpose	View the online measurement values, read out the logging files remotely through S4A software and USB 4G dongle

Supply

Main power supply	100 ... 240 VAC, 50/60 Hz, 1.4 A
-------------------	----------------------------------

Data interface

Connection	USB micro, LAN (Ethernet)
Purpose	Read logger files & screenshots, show live data
Integrated web server	Remote monitoring (LAN)

General data

Configuration

PC Software	S4C-Display (via USB or LAN)
-------------	------------------------------

Display

Integrated touch screen	5" high resolution graphic display, 800 x 480 pixels with touch interface
-------------------------	---

Material

Housing	PC + ABS
---------	----------

Miscellaneous

Electrical connection	2 x M12 (5 pole) for SDI; 2 x Optional M12 (5 pole) for analog and pulse; 2 x M12 (5 pole) for Modbus; 1 x RJ45 Ethernet

Storage temperature	-20 ... 50 °C
---------------------	---------------

Transport temperature	-20 ... 50 °C
-----------------------	---------------

Ordering

Please use the following tables to assist in placing your order with our sales staff.

Data logger

P560 5100	S551-P4, Portable Display and Data Logger, 4 digital input channels, power cord, USB cable, S4A software, CAA software
P560 5101	S551-P6, Portable Display and Data Logger, 4 digital input channels and 2 analog, power cord, USB cable, S4A software, CAA software
A1670	USB 4G dongle for S551/S600, including S4A software

Flow sensors

S601 0401	S401, 300 mm Shaft, insertion type thermal mass flow meter, max measuring range, DN15 ... DN300, Modbus/RTU, including 5 m cable with connector to S551
S601 0430	S430, 220 mm Shaft, insertion type Pitot tube flow meter for wet air, DN25 ... DN250, Modbus/RTU, including 5 m cable with connector to S551

Dew point sensor

S601 0215	S215 Dew Point Transmitter, -20 ... +50 °C Td, Measuring chamber with quick coupling, 5 m cable with connector to S551
S601 0211	S211 Dew Point Transmitter, -60 ... +20 °C Td, Measuring chamber with quick coupling, 5 m cable with connector to S551
S601 0220	S220 Dew Point Transmitter, -100 ... +20 °C Td, Measuring chamber with quick coupling, 5 m cable with connector to S551

Pressure sensors

S694 1886	Pressure Transmitter, 0 ... 1.6 MPa(g), 4 ... 20 mA including a 5 m cable with connector to S551 (works only on S551-P6)
S694 0356	Pressure Transmitter, 0 ... 4.0 MPa(g), 4 ... 20 mA including a 5 m cable with connector to S551 (works only on S551-P6)
S694 1887	Pressure Transmitter, 0 ... 1.6 MPa(g), Modbus/RTU including a 5 m cable with connector to S551 (works on S551-P4 & P6)
S694 1888	Pressure Transmitter, 0 ... 4.0 MPa(g), Modbus/RTU including a 5 m cable with connector to S551 (works on S551-P4 & P6)

Amp sensor

S554 0156	Electrical Current Transmitter, 1000A, 100 mm diameter, including connector to S551
S554 0157	Electrical Current Transmitter, 3000A, 150 mm diameter, including connector to S551

Temperature sensor

S693 0005	Temperature Transmitter, -50 ... +200 °C, 4 ... 20 mA loop powered, 6 x 150 mm sensor tube, 5 m cable with connector
A554 6003	Compression fitting, 6 mm, G 1/2" thread, 0.6 MPa
A554 6004	Compression fitting, 6 mm, G 1/2" thread, 1.6 MPa

Power meter (for 3 phase and single phase measurement)

P554 0134	Portable Power and Energy Meter S110-P, Modbus/RTU, including 4 test leads, 4 test clips, 5 m cable with connector to S551
S554 0160	Electrical Current Transmitter for S110-P, 1000 A, 100 mm diameter, 1.8 m cable, connector to S110-P
S554 0161	Electrical Current Transmitter for S110-P, 3000 A, 150 mm diameter, 1.8 m cable, connector to S110-P
S554 0162	Electrical Current Transmitter for S110-P, 100 A, 160 mm diameter, 1.8 m cable, connector to S110-P

Note: For 3 phases power supply 3 Rogowski coils are needed.

Ordering

Please use the following tables to assist in placing your order with our sales staff.

Other sensors / extensions

P554 0080 8 channel analog input extension, connectable to S551, including 5 m cable with connector, 2-wire sensors support only
Note: we offer other two models which supports 3-wire inputs and combination of 2-wire and 3-wire. Please contact the sales.

A554 3314 Portable Modbus splitter box, with M12 connector

Accessories

A553 0103 Extension cable, 5 m, male-female connectors

A553 0110 Open wires cable, 5 m cable with connector

A553 0111 Sensor cable, M12, 5 m with connector to S551

A554 0035 Transport case S551 for sensors and cables, L560 x W450 x H160 mm (internal compartment can be arranged according to your individual sensor requirements)

A554 0036 Transport case, customized for 1 x S110-P, 3 Rogowski coils, 4 x test leads, 4 x test clips, 1 x S430

* Please contact us for further accessories and details.

S4M SaaS

Smart Compressed Air System Monitoring Software

**Coming
Soon!**

Next Level of Compressed Air System (CAS) Monitoring Software Service

PROCESS VALUE
VISUALIZATION

CUSTOMER
MANAGEMENT

LIVE VIEW OF
PROCESS DATA

POWERFUL
REPORTING MODULE

EXTENSIVE
DATA ANALYSIS

MONITORING &
OPTIMIZATION

ALARMS &
NOTIFICATIONS

PERSONALIZED
INTERFACE

Benefits

- ✔ Ensuring system performance and reliability with remote monitoring and alarm management
- ✔ Energy saving and CO₂ emission reduction by detecting system efficiency potentials
- ✔ Live monitoring of air production, usage and historical records for detailed system overview
- ✔ Minimization of initial CapEx by fast development and launch
- ✔ Easy to use plug & play solution for fast implementation of gateways and devices
- ✔ Auto-generate customized CAS reports for audits

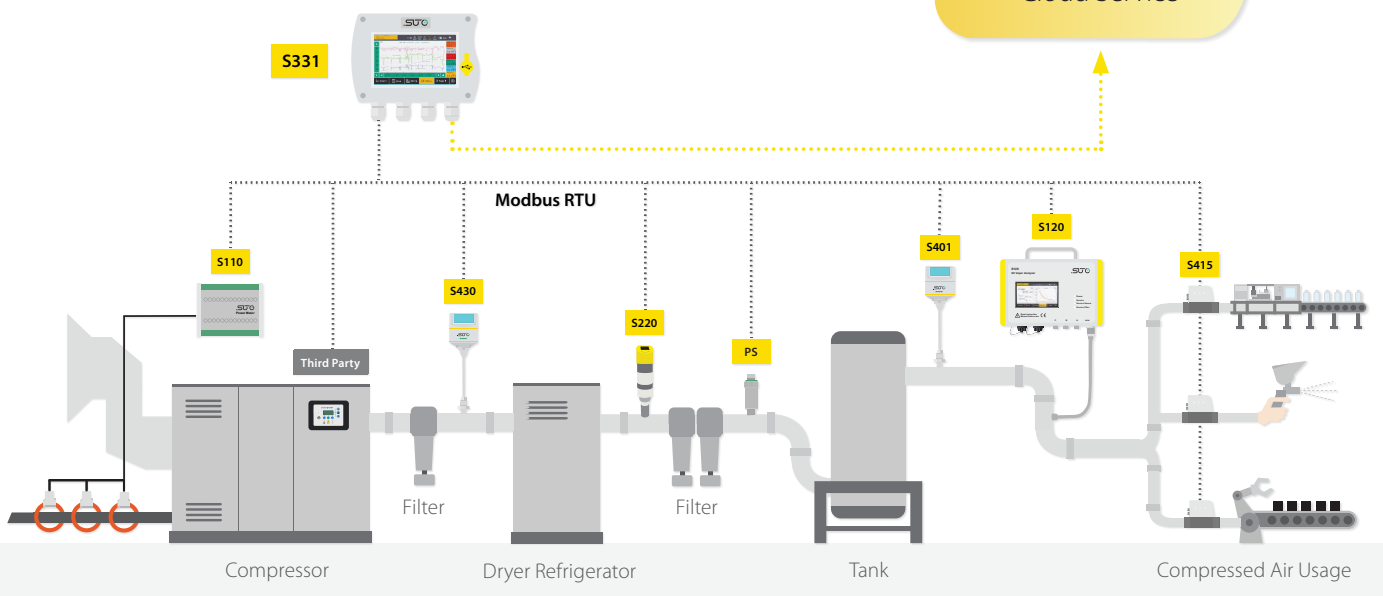

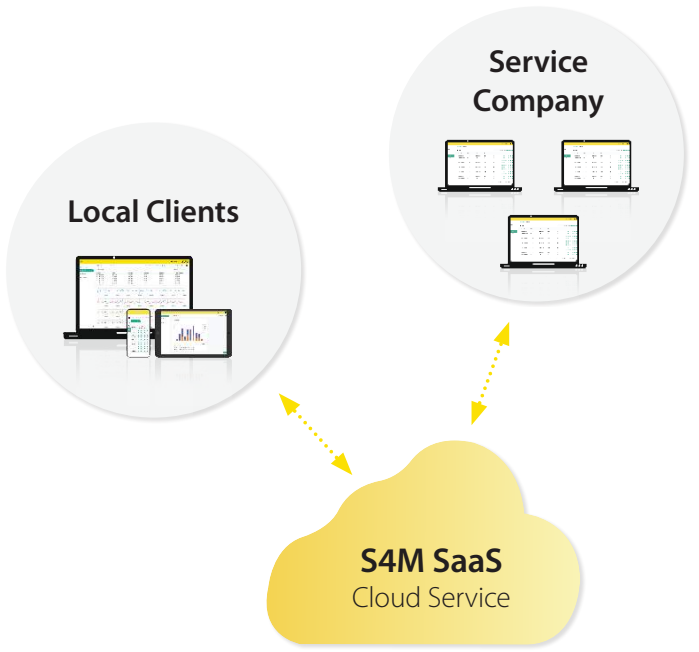

Manage and ensure your whole compressed air system — reduce downtime and costs

S4M SaaS has been developed from the ground up with the focus on Compressed Air System Monitoring and Optimization.

The software allows end users to get their CAS under control, ensure their process safety and the reliability of their compressed air system. At the same time, the software offers compressed air service companies to have their client's system up and running, by simply checking the end client's CAS from anywhere at any time.

S4M SaaS not only gathers the measurement data from in-field devices, but with its built-in features, S4M SaaS actually is taking care of the complete system, from asset management, alarms, calibration & maintenance to consumption and energy reporting, all in one solution.

With S4M SaaS end users as well as service companies finally getting compressed air systems under control.

Customizable Dashboard

- Dashboard for system overview and monitoring
- Real-Time data and graphical analysis from the dashboard
- Dashboard fully customizable to users needs with dashboard widgets
- Quick analyzes directly from the dashboard
- Alarm and status indication

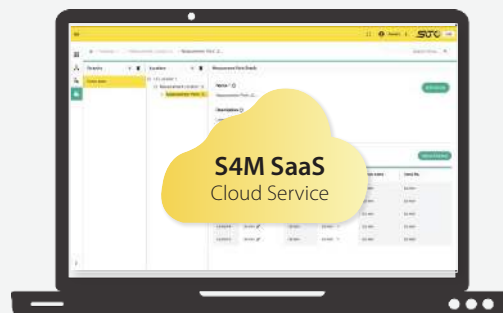

Powerful Data Analysis

- Analyze all channels and parameters within a single module
- Compare historical data with actual data
- Benchmark your system and define KPIs
- Easily find weak spots and optimization potentials at a single glance

Live View of Process Data

- Real-time measurement data of multiple factories and locations
- Live view of all measurement channels
- Drag & drop marker to place measurement data
- Upload system / factory plan to place your measurement device
- Alarm indications and notifications

Name	Ready/Overhaul	In	Overhaul	Location	Status
Location 1	Ready	In	Overhaul	Location 1	Ready
Location 2	Ready	In	Overhaul	Location 2	Ready
Location 3	Ready	In	Overhaul	Location 3	Ready
Location 4	Ready	In	Overhaul	Location 4	Ready
Location 5	Ready	In	Overhaul	Location 5	Ready

Location Management

- Logical and easy to understand complex structures of field devices
- Define factories, measurement locations and measuring Points
- Assign factories to different customers
- Convert Measurement units and set up virtual channels

Name	Location	Value	Unit
Asset 1	Location 1	100	kg
Asset 2	Location 2	200	kg
Asset 3	Location 3	300	kg
Asset 4	Location 4	400	kg
Asset 5	Location 5	500	kg

Asset Management

- Track all components of the CAS in a single solution
- Create maintenance and calibration schedules and get notified in time
- Set up regular tasks on your CAS
- Track sensitive equipment by serial number & get notifications

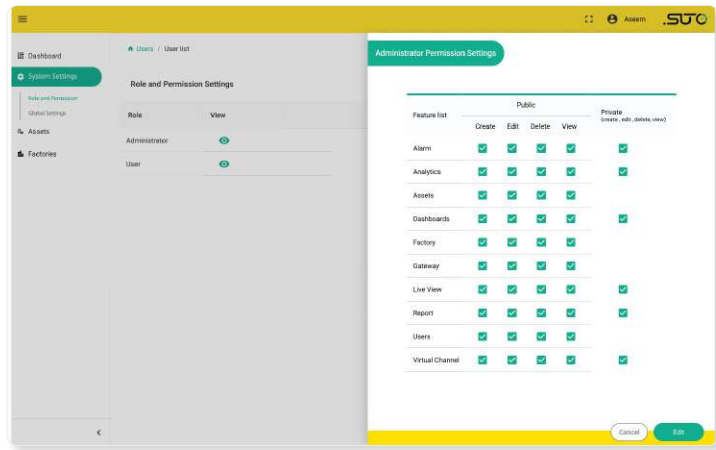

Alarm	Alarm Type	Status	Action
Alarm 1	Pressure	Active	Alert
Alarm 2	Temperature	Active	Alert
Alarm 3	Flow	Active	Alert
Alarm 4	Level	Active	Alert
Alarm 5	Speed	Active	Alert

Alarm Management

- System wide alarm management with full alarm history
- Active alarms list with mute functions during maintenance or repairs
- Assign alarms to any channel within the system
- Multiple on-screen alarm notifications as well as email and push notifications on smartphones

Powerful User Access Right Management

- Easy to set up check-box based access-rights management
- Most flexibel user rights: Read-only accounts, default user accounts, multiple administrators
- Access rights management for each module
- Create private dashboards, alarms, analytics to be seen only by the specific user
- Set up multiple accounts and distribute their access rights

Create Powerful Reports

- Create powerful reports with a single Click
- Regular reporting with suggestions
- Energy cost and consumption reports
- Get reports sent automatically daily, monthly, weekly, quarterly or annually by Email
- Customize report colors and logos
- No more manual reporting needed so user can focus on more important things
- Set up management users to receive automatic financial reporting

Why Data Is So Important?

Compressed air is one of the most expensive energy forms and widely used in almost any application and process. Almost 50 % of the compressed air and gases that is generated is not used efficiently.

Profound real-time system data will help to unleash optimization potentials:

- ✓ System Performance and Reliability
- ✓ Energy Efficiency and Cost Reduction
- ✓ Product Quality and Safety
- ✓ ISO Purity Requirements
- ✓ Carbon Footprint Reduction
- ✓ Less Maintenance and System Failures

Data Analysis

Data Logging

S331 Data Logger and Display

Plug & Play gateway and central interface between field devices and S4M SaaS monitoring solution.

Connect up to 16 Modbus/RTU sensors, 2 analog sensors and 2 SDI sensors to a single data logger

Field Devices

SUTO SDI and Modbus/RTU sensors as well as analog sensors can be connected to the S4M SaaS within minutes. To connect the Modbus/RTU sensors properly on an RS 485 bus system, it's recommended to daisy-chain the sensors to one of the inputs. For this purpose, SUTO offers a RS 485 splitter to simplify the connection.

Through this method, users can add up to 16 sensors to the S331 master input. This allows to monitor whole plants with the S4M SaaS using a single data logger.

By relying on the industry standard protocol Modbus/RTU, third-party sensors and device can be easily integrated into the S4M SaaS through the S331 Data Logger Gateway. Field devices can be easily set up using the configuration software, allowing to add a third-party sensor within seconds.

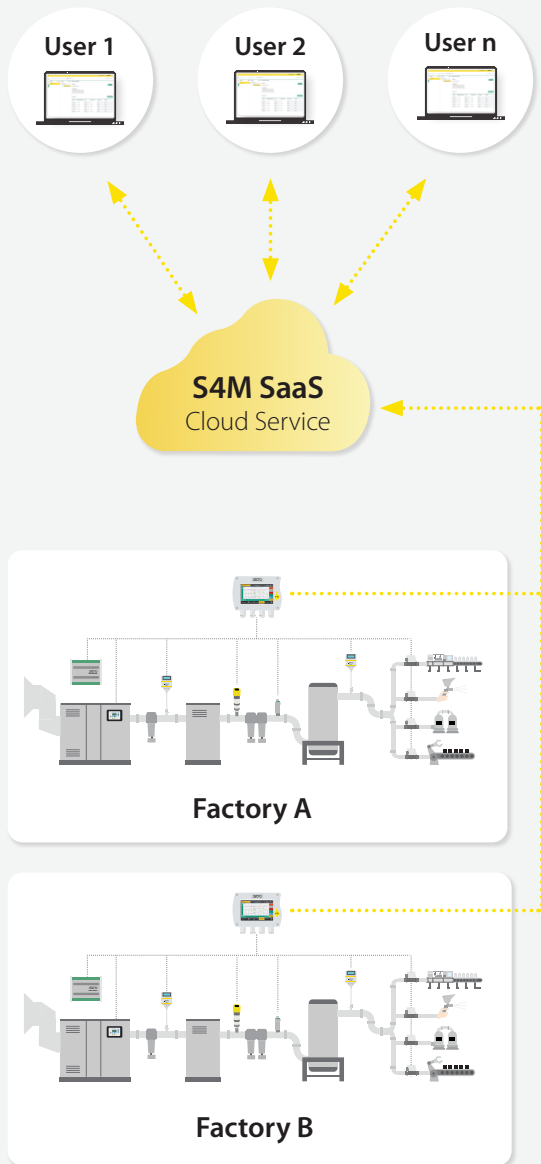

Of course, all connected sensor data can be logged to the internal memory, used for virtual channel calculations. At the same time, real-time values are sent to S4M SaaS and safely stored.

End User License

The End User License is made for the Compressed Air System Operators and Facility Management.

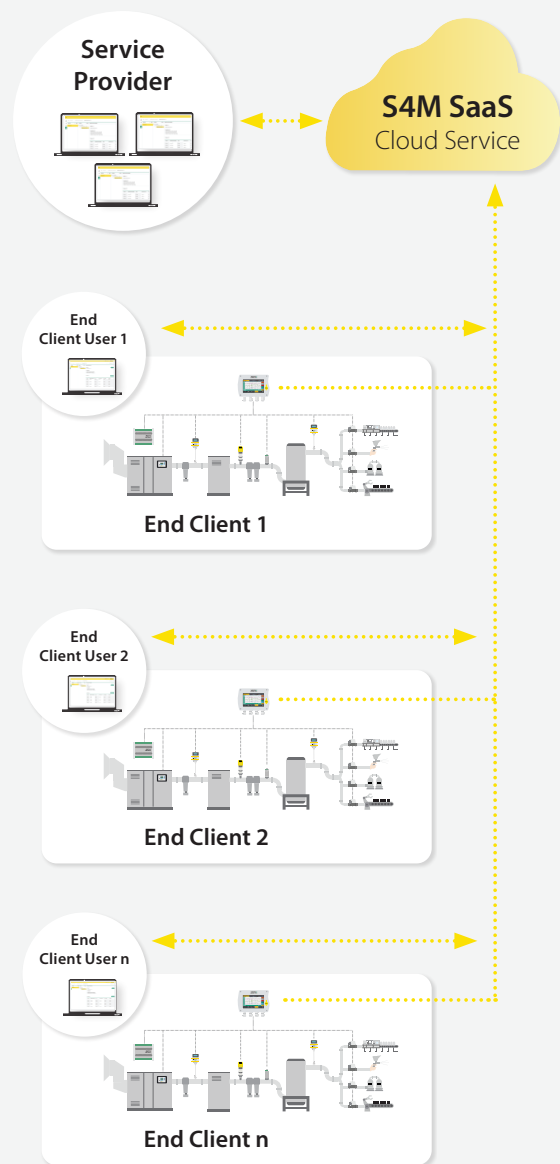

This License grants access to the own compressed air system throughout the whole factory and among multiple locations. The system can be accessed by multiple users within the same organization.

Service Provider License

The Service Provider License is made for Compressed Air Service Companies, which are offering their service for clients. Service Companies are enabled to monitor their clients compressed air systems, all over the world.

Each client is separated and the Service provider is enabled to grant the end clients access to their own system.

License Packs

Explanations

User

A user is a login who can access the system and full functionalities. User access rights can be controlled by the administrator and set individually.

One user is always the administrator with all access rights.

Channels

Each Measurement value is represented as a channel.

Example: 1 Flow Meter (Flow and Consumption = 2 channels) + 1 Dew Point Meter (Dew point, Temperature and Humidity = 3 channels) results in a total of 5 channels.

Created virtual channels are represented as a channel and part of the total channels available

S4A

Data Analysis Software

GRAPHIC ANALYSIS
Powerful graphic analysis

ONLINE READING
Real time data reading with USB or Ethernet connection

FREE TO USE
No payment or subscription needed

ANALYSIS ON EXPORTED FILES
Export data to the .XLSX and .CSV file

READOUT OF SCREENSHOTS
Read screenshots from SUTO S331

REMOTE CONNECTION
Read out field devices via Internet connections

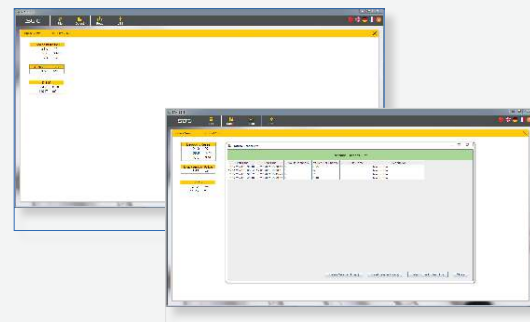

Benefits

- ✔ Free software with quick analysis through powerful graphs and exported tables
- ✔ On-site real time analysis through online data reading
- ✔ Remote access of SUTO displays and Loggers that are equipped with LTE/4G modem
- ✔ Easy installation with installation wizard
- ✔ Multiple languages available

Data Analysis with S4A

S4A is a stand alone free software used to analyze measurement data recorded by SUTO data loggers. Local stored logger files from any SUTO device with logging function can be opened, analyzed and exported.

- Real-time online readings of a SUTO device via a USB , Ethernet or wireless LTE/4G connection.
- Powerful graphic tools allowing basic and in-depth analyzes of the data and prepare reports.
- Easy is to set up interface for hassle-free use. No complicated setup menus or configurations. Simply connect SUTO data loggers and read logging files with a single click.
- Integrated export function offers data exchange in .xlsx and .csv format.
- Software recordings are downloaded to the PC via USB, LAN or wirelessly using the LTE/4G Modem.
- The wireless connection offers full functionality as if the devices would be connected via USB. This makes it most flexible and versatile.

EASY TO USE
User-friendly design

WIRELESS CONNECTION
Connection to devices in hard-to-reach places

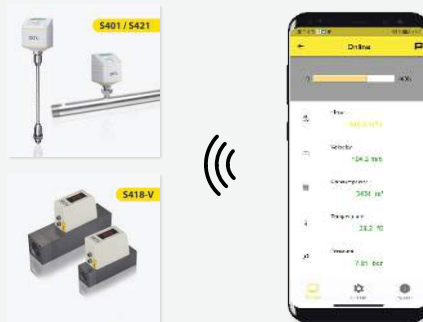

Benefits

- ✔ Wireless connection to SUTO iTEC field devices
- ✔ On-site configuration without the need of PC; everything runs from your smartphone
- ✔ Third-party access protection by QR code protected settings
- ✔ Real-time data readings and sensor settings
- ✔ User friendly design with intuitive workflows
- ✔ No registration or subscription needed
- ✔ Online Configuration and guided setup as well as customer calibration features

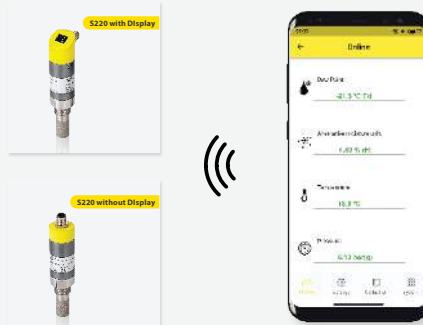

S4C-FS App for SUTO Flow and Consumption Meters

- Connect wirelessly to SUTO flow and consumption sensors
- Download for Android® and iOS® smartphones
- Live data in the palm of your hands
- On-site configuration and settings
- Fast commissioning of field devices
- User calibrations
- Data logger settings and operations

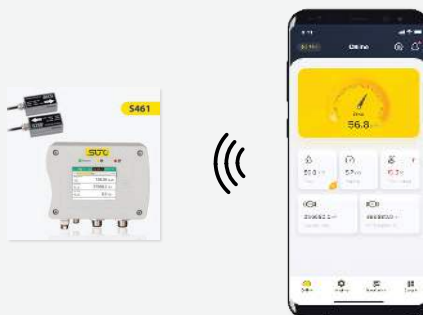

S4C-DP App for SUTO Dew Point Meters

- Connect wirelessly* to SUTO dew point sensors
 - Download for Android® and iOS® smartphones
 - Live sensor readings on your smartphone
 - On-site configuration and settings
 - Fast commissioning of field devices
 - User calibrations and adjustments
- *needs the optional Wireless-DP-Adapter

S4C-US App for SUTO Ultrasonic Meters for Liquids

- Connect wirelessly to SUTO ultrasonic flow meters
- Download for Android® and iOS® smartphones
- Guided setup and installation
- Adjust installation parameters and get signal quality feedback
- Actual Flow and Total consumption as well as historical data
- On-site configuration and settings
- Logger data readout and logger file sharing
- User calibrations

S120

Oil Vapor Monitor

Opt. 1 Without Display

Opt. 2 With Display

ACCURATE RESULTS
Latest PID sensor technology

TOUCH SCREEN
For easy operation

EASY INSTALLATION
Plug and Play Solution

COMPACT DESIGN
Fits into your application

DATA LOGGER
Integrated as option

DEW POINT SENSOR
Option:
-100 ... +20 °C Td

Benefits

- ✔ Plug & Play setup with quick connections. Can be used in portable and stationary applications.
- ✔ Oil vapor measurement in a range of 0.001 to 5.000 mg/m³
- ✔ Various output signals to connect the unit to building management systems
- ✔ PID sensor technology for fast response time and Online monitoring
- ✔ Optional with integrated 5" touch screen display with data logger function
- ✔ Optional with integrated dew point measurement
- ✔ LED indications for status and alarms

Simple Installation – Outstanding Performance

The S120 is designed to offer users an efficient way of measuring residual oil contents in a compressed air system.

The integrated automatic calibration compensates temperature and humidity drifts in the supplied air, resulting in most accurate, reliable and long term stable measurement results.

The simple plug & play installation, as well as its outstanding performance, makes the S120 the ideal choice when oil vapor needs to be measured and monitored.

Applications

Oil free compressed air is not an easy task to be achieved. Monitoring is a must in many industries and applications to avoid contamination in products and risks for health of humans.

- Medical air
- Pharmaceuticals
- Breathable air for rescue workers and divers
- Food and beverage
- Semiconductor fabs
- Conveyance of hygroscopic food
- High tech processes

Optional Integrated Dew Point Sensor

To ensure compressed air quality and purity, dew point measurement is an essential key parameter. Therefore, we offer an optional integrated Dew Point Sensor, -100 ... +20 °C Td, to measure both parameters in one compact device with an excellent price performance ratio.

Output Signals

- 4 ... 20 mA analog output
- Modbus/RTU and Modbus/TCP (TCP only with Display version)
- Alarm Relay

Technical Data

Measurement

Oil Vapor

Measuring range	0.001 ... 5.000 mg/m ³ (Based on 1000 hPa(a), 20 °C, 0 % relative humidity)
Accuracy	5 % of reading ± 0.003 mg/m ³
Resolution	0.001 mg/m ³
Selectable units	mg/m ³ / ppm
Sensor principle	Photo ionization detector

Pressure

Measuring range	0 ... 16 bar(g)
Accuracy	0.5 % FS
Resolution	0.01 bar(g) / 0.001 MPa / 0.1 psi
Selectable units	bar(g) (default), MPa and psi (on request)
Sensor principle	Piezo resistive pressure sensor

Dew Point (optional)

Measuring range	-100 ... +20 °C Td
Accuracy	±1 °C Td (0 ... 20 °C Td) ±2 °C Td (-70 ... 0 °C Td) ±3 °C Td (-100 ... -60 °C Td)
Resolution	0.1 °C Td
Selectable units	°C Td / °F Td
Sensor principle	QCM + Polymer

Temperature

Measuring range	0 ... 50 °C
Accuracy	0.5 °C
Resolution	0.1 °C
Selectable units	°C / °F
Sensor principle	NTC

Signal / Interface & Supply

Outputs / Interface

Analogue output	4 ... 20 mA, isolated
Alarm output	Relay, NO, 40 VDC, 0.2A
Digital interface	Modbus/RTU (RS485) Modbus/TCP (Ethernet) & USB (only available for display version)
Display (optional)	5" color touch screen with a data logger of 30 million measurement values

Supply

Power supply	24 VDC ± 5 %, 10 W
--------------	--------------------

- Power
 - Alarm
 - Service Sensor
 - Service Filter
- LEDs indicate if pre-set alarms are reached, or if filters and sensors need to be serviced. The service indications start blinking 4 weeks before expiring and turn on permanently when a service is immediately required.

General Data

Measuring medium	Compressed air, N ₂ , CO ₂ (for other gases please contact us)
Sample flow rate	< 2 l/min, measuring gas is released to ambient
Sample rate	1/sec
Gas / Operating temperature	-20 ... +50 °C
Transport temperature	-30 ... +70 °C
Operating pressure	3 ... 15 bar(g) 0.5 ... 2 bar(g) (optional) 0.60 ... 1.07 bar(a) (ambient version only)
Gas humidity	< 40 % rel. humidity, no condensation
Gas connection	6 mm quick connect
UV lamp lifetime	6,000 working hours or 1 year, whichever comes first
Electrical connection	M12, USB, RJ45
Settings	Various sensor settings can be performed through SUTO display units or through the related service software
Housing material	PC, Al alloy
Protection class	IP65
Dimensions	271 x 231 x 91 mm
Weight	2.4 kg
Approval	CE

Ordering

Please use the following table to assist in placing your order with our sales staff.

S120 Oil Vapor Monitor

Order No.	Description
S604 1201	S120, Oil Vapor Monitor, 0.001 ... 5.000 mg/m ³ , 4 ... 20 mA output, RS-485, alarm output, supply 24 VDC, incl. power supply
S604 1202	S120-P, Portable Oil Vapor Monitor, 0.001 ... 5.000 mg/m ³ , 4 ... 20 mA output, RS-485, alarm output, connectable to S551, transport case, incl. power supply
S604 1203	S120, Oil Vapor Monitor, 5" touch screen, 0.001 ... 5.000 mg/m ³ , 4 ... 20 mA output, RS-485, alarm output, supply 24 VDC, incl. power supply
P604 1205	S120-P, Portable Oil Vapor Monitor, 5" touch screen, 0.001 ... 5.000 mg/m ³ , 4 ... 20 mA output, RS-485, alarm output, 24 VDC supply, incl. transport case, power supply
P604 1215	S120-Ambient Portable Oil Vapor Monitor for ambient air, 5" touch screen with data logger, 0.001 ... 5.000 mg/m ³ , 4 ... 20 mA, RS-485 (Modbus RTU), Ethernet (Modbus TCP), alarm output, integrated pump, supply voltage 24V DC, incl. power supply and transport case.
A1250	Option: Integrated dew point sensor, -100 ... +20 °C Td (only for S604 1203 and P604 1205)
Accessories	
A554 1203	Oil vapor zero filter, 1.5 MPa max, with quick connectors at both ends
A554 1207	Replacement kit for zero filter oil vapor analyzer
A554 0120	Option, Transport case S120/130
Calibration	
R200 0120	S120 General service and re-calibration (for all models without Dew Point Sensor option A1250): - General inspection of the unit - Replacement of tubes and fittings - Cleaning of lamp and sensor - Assembly and test of unit - Calibration of oil sensor - Calibration Certificate
R200 0121	S120 General service and re-calibration with dew point sensor option (for S604 1203 and P604 1205 with Dew Point Sensor Option A1250): - General inspection of the unit - Replacement of tubes and fittings - Cleaning of lamp and sensor - Assembly and test of unit - Calibration of oil sensor - Calibration of dew point sensor - Calibration Certificate

S130 / S132

Laser Particle Counter

ECO (0.3 < d ≤ 5.0 μm)

S130

S132

PRO (0.1 < d ≤ 5.0 μm)

PARTICLE MEASUREMENT
According to ISO-8573 Standard

EASY INSTALLATION
Plug and Play Solution

PRO VERSION S132
Smallest channel 0.1 < d ≤ 0.5 μm

ECO VERSION S130
Smallest channel 0.3 < d ≤ 0.5 μm

Benefits

- ✓ Accurate compressed air quality measurements and monitoring with particle size ranges:
 $0.1 < d \leq 0.5 \mu\text{m}$ / $0.5 < d \leq 1.0 \mu\text{m}$ / $1.0 < d \leq 5.0 \mu\text{m}$ / $d > 5.0 \mu\text{m}$
- ✓ Classify the compressed air systems according to ISO 8573-1 while being in compliance with the ISO 8573-4
- ✓ Easy connection to compressed air system through a 6 mm hose with quick connectors
- ✓ Integrated pressure diffuser suitable for inlet pressure ranges of 3 ... 15 bar(g)
- ✓ Optional 5" touch screen integrated for live data readings and data logging functions
- ✓ Designed to be used in stationary monitoring solutions, as well as in portable audit measurements

Reliable particulates counts in compressed air systems

The SUTO S130 / S132 Laser Particle Counters are optimized for 24/7 compressed air quality monitoring. Unlike its competition, the SUTO laser particle counters are coming with integrated pressure diffusers to reduce the line pressure inside the instrument. Users are enabled to use the laser particle counters directly at the compressed air system, without installing pressure reducers and therefore being in compliance with the ISO 8573-4 standard.

The measurement values are displayed in counts per volume (cn/m3), but can also display alternative volume units like cubic-feet or liter.

The integrated display offers live readings for all channels, signal output settings as well as an integrated data logger, to store the measurement data on the device.

Applications

Particle free compressed air is not an easy task to be achieved. Monitoring is a must in many industries and applications to avoid contamination in products and health risks for humans.

- Medical air
- Pharmaceuticals
- Breathable air for rescue workers and divers
- Food and beverage
- Semiconductor fabs
- Conveyance of hygroscopic food
- High tech processes

Output Signals

- 4 ... 20 mA analog output
- Modbus/RTU and Modbus/TCP (TCP only with Display version)
- Alarm Relay

Particulates in Paint Shops

In a modern paint shop, the painting quality highly depends on the quality of the compressed air. Modern paint systems inject the paint into the paint gun, where compressed air is driving the paint through the nozzle. When existing the nozzle, the paint atomizes into a fine and uniformed mist. These tiny paint particles repel each other as they are leaving the nozzle and stick to the object being painted.

Excess impurities in the compressed air will cause the paint particles to “clump”, resulting in uneven coverage and an inconsistent finish.

The only way to secure this high-quality painting process is by monitoring the particle concentration of the compressed air supply.

Air Quality Monitoring according to the ISO 8573-1

The ISO 8573-1 defines the compressed air purity classes for particulates in a compressed air system by providing the limit values for each channel.

The S132 Laser Particle Counter measures the channels as defined by the ISO 8573-1:

- $0.1 < d \leq 0.5 \mu\text{m}$
- $0.5 < d \leq 1.0 \mu\text{m}$
- $1.0 < d \leq 5.0 \mu\text{m}$

For these 3 channels, the limit values are defined and divided into classes.

But furthermore, as stated in the ISO 8573, the fourth channel must be measured as well:

- $d > 5.0 \mu\text{m}$

This channel value must be 0 for the classes 0 ... 5, as otherwise the classification falls into class 6 or worse, where a mass concentration is defined as limit values.

Certain industries like the pharmaceutical and food industry requires high-quality compressed air. By meeting the ISO 8573-1 standard requirements you can:

- 
Ensure Process and Product Safety:
 Contaminants mixing with applications effect product results and can create safety concerns.
- 
Prevent production downtime:
 Processes and machines are stopped to find and eliminate the contamination issues.

**PDF
REPORTING**
Create ISO 8573-1
reports on the device

Benefits

- ✔ All-in-one device measures Particle concentration, dew point and oil vapor
- ✔ Measures additionally the temperature and pressure
- ✔ Software guided measurement makes it easy to generate reliable results
- ✔ Report generator creates PDFs for ISO 8573-1 audits
- ✔ Ultra portable and compact design

Plug & Play Measurement — Save Precious Time

ISO 8573 compliant purity quantifications of compressed air systems are bound to time-consuming installations and long-lasting test runs ... It's time for a revolution: The S600 is unlike its competition.

It combines the latest sensor technology, software-guided measurements and a time-saving setup into a handy, touchscreen controlled multi-tool. With our S600 you will finish measurement runs in much less time than with your traditional method, after that you don't even want to leave your new comfort zone again. Trust us.

Remote connection

By connecting a LTE/4G modem to the designated USB port, S600 can be monitored remotely through S4A software

Monitoring of All Relevant Contaminants

Particle Concentration Measurement

$0.1 < d \leq 0.5 \mu\text{m}$ / $0.5 < d \leq 1.0 \mu\text{m}$ / $1.0 < d \leq 5.0 \mu\text{m}$ / $5.0 \mu\text{m} < d$

Dew Point Measurement

-100 ... +20 °C Td

Oil Vapor Measurement

0.001 ... 5.000 mg/m³

ISO 8573-1 Classification

5 in 1 Measuring Device

The S600 is the portable multi-tool for ISO 8573-1 compressed air purity measurements. It measures, records and validates quality parameters like particle concentration, dew point, oil vapor contents, temperature and the pressure of compressed air systems.

Particle Concentration Measurement

- Measurement methods according to ISO 8573-4 standards (together with isokinetic sampling device)
- Latest laser detection technology
- Smallest particle size 30 ... 70 %, next bigger sizes 90 ... 110 % per ISO 21501-4

Dew Point Measurement

- Large ranges due to the unique multiple sensor technology
- Long-term stable and well-proven measurement methods
- High precision with an accuracy of ± 2 °C Td

Oil Vapor Measurement

- Latest photoionisation detector (PID) with self-calibration
- Measuring range according to ISO 8573-1 Class 1 to Class 5
- High precision with 5 % of reading ± 0.003 mg/m³ accuracy

Pressure Measurement

- State of the art sensor technology
- Additional quality data about the compressed air system

Integrated Data Logger

- Integrated data logger records all channels in parallel for later analysis
- 5" touchscreen allows you to interact with the device on site. There is no need for a PC to manage the device.

ISO 8573-4 Isokinetic Sampling Device

For particle measurements according to ISO 8573 an isokinetic sampling tube has been designed. This optional equipment enables you to monitor and adjust the air flow of the particle measurement to ensure the correct isokinetic sampling.

Applications

- ✓ Air quality measurements in medical, pharmaceutical, food and beverage applications
- ✓ Compressed air quality audits in regards to the ISO 8573-1
- ✓ Point-of-use measurements to ensure process safety and quality in all applications
- ✓ Monitoring of high tech applications with strict air purity requirements

Create Compressed Air Quality Reports

The S600 enables users to create powerful PDF reports directly on site. The reports are following the recommendations stated in the ISO 8573, additionally customer related data as well as service provider details can be entered on-screen, making it even easier to perform audits and to create meaningful reports.

PDF reports can be created from any recordings on the device and are copied on the fly to a connected USB drive for direct print-outs.

ISO 8573-1 Compressed Air Classes

ISO 8573-1:2010 is the main publication of the ISO 8573 series of standards, because it contains the permissible amount of contaminants per cubic meter of compressed air is fixed.

Class	Particle Concentration			Pressure Dew Point	Oil Concentration
	cn/m ³			°C (°F)	mg/m ³
	0.1 < d ≤ 0.5 μm	0.5 < d ≤ 1.0 μm	1.0 < d ≤ 5.0 μm		
0	As specified by the equipment user or supplier and more stringent than class 1				
1	≤ 20,000	≤ 400	≤ 10	≤ -70 (94.0)	≤ 0.01
2	≤ 400,000	≤ 6,000	≤ 100	≤ -40 (-40.0)	≤ 0.1
3	not specified	≤ 90,000	≤ 1,000	≤ -20 (-4.0)	≤ 1
4	not specified	not specified	≤ 10,000	≤ +3 (+37.4)	≤ 5
5	not specified	not specified	≤ 100,000	≤ +7 (+45.6)	> 5
6	x	x	x	≤ +10 (+50.0)	x

Why should you focus on your ISO 8573-1 specifications?

Certain industries like the pharmaceutical and food industry requires high-quality compressed air. By meeting the ISO 8573-1 standard requirements you can:

- ✓ Ensure Process and Product Safety:**

Potential incidents, like contaminants meeting food via water and oil, can create safety concerns and unreliable processes.
- ✓ Avoid Production Failures and Poor Quality Finishes:**

Contaminants mixing with applications effect product results.
- ✓ Prevent production downtime:**

Processes and machines are stopped to find and eliminate the contamination issues.

5" large color LCD

**INDUSTRIAL
DESIGN**
For outdoor
applications

PRECISION
Accurate
measurements

**COMPACT
DESIGN**
Can be installed
anywhere

Benefits

- ✓ All-in-one device measures particle concentration, dew point and oil vapor
- ✓ Measures additionally the temperature and pressure
- ✓ Software guided measurement makes it easy to generate reliable results
- ✓ Real time information can be retrieved from the S601 by SCADA systems via MODBUS outputs
- ✓ Compact design and easy setup, just connect the unit to power and the compressed air supply

Constant Measurement — 24/7 Monitoring

The S601 combines three major quality measurements into a single wall mountable device. Optimized to be used as Plug & Play system, the S601 helps users to identify the air quality at a glance.

The robust cabinet makes it well suited for rough industrial applications.

A stainless steel cabinet is offered on request, which is suited for pharmaceutical and medical applications.

The S601 combines the latest sensor technology and a time-saving setup into a one of its kind multi-tool. Mount it, power it, connect it and measure. Trust us, it is that easy.

Monitoring of All Relevant Contaminants

Particle Concentration Measurement

$0.1 < d \leq 0.5 \mu\text{m}$ / $0.5 < d \leq 1.0 \mu\text{m}$ / $1.0 < d \leq 5.0 \mu\text{m}$ / $5.0 \mu\text{m} < d$

Monitoring Software

Environment

impurities in the ambient air

Various Applications

- ✓ Air quality measurements in medical, pharmaceutical, food and beverage applications
- ✓ Compressed air quality audits in regards to the ISO 8573-1
- ✓ Point-of-use measurements to ensure process safety and quality in all applications
- ✓ Monitoring of high tech applications with strict air purity requirements

5 in 1 Measuring Device

The S601 is the stationary multi-tool for compressed air purity measurements. It measures, records and validates quality parameters like particles, dew point, oil vapor contents, temperature and the pressure of compressed air systems. It offers different signal outputs to seamlessly integrate it into your system. The integrated logger stores the recorded values safely.

Particle Concentration Measurement

- Measurement methods according to ISO 8573 standards
- Latest laser detection technology
- Smallest particle size 30 ... 70 %, next bigger sizes 90 ... 110 % per ISO 21501-4

Integrated Data Logger

- Integrated data logger records all channels in parallel for later analysis
- 5" touchscreen allows you to interact with the device on site
- There is no need for a PC to manage the device

Oil Vapor Measurement

- Latest photoionisation detector (PID) with self-calibration
- Wide range of oil vapor concentrations
- High precision with 5 % of reading \pm 0.003 mg/m³ accuracy

Dew Point Measurement

- Large ranges thanks to the unique multiple sensor technology
- Long-term stable and well-proven measurement methods
- Outstanding precision with a high accuracy over the full range from -100 to +20 °C Td

Pressure Measurement

- State of the art sensor technology
- Additional quality data about the compressed air system

Modular Concept

The S601 is based on a modular concept which enables the client to decide which type of measurement needs to be performed.

This makes the S601 customizable and flexible to offer the end-user the best suited instrument to finish the desired measurement tasks.

ISO 8573-1 Compressed Air Classes

ISO 8573-1:2010 is the main publication of the ISO 8573 series of standards, because it contains the permissible amount of contaminants per cubic meter of compressed air is fixed.

Class	Particle Concentration			Pressure Dew Point	Oil Concentration
	cn/m ³			°C (°F)	mg/m ³
	0.1 < d ≤ 0.5 μm	0.5 < d ≤ 1.0 μm	1.0 < d ≤ 5.0 μm		
0	As specified by the equipment user or supplier and more stringent than class 1				
1	≤ 20,000	≤ 400	≤ 10	≤ -70 (94.0)	≤ 0.01
2	≤ 400,000	≤ 6,000	≤ 100	≤ -40 (-40.0)	≤ 0.1
3	not specified	≤ 90,000	≤ 1,000	≤ -20 (-4.0)	≤ 1
4	not specified	not specified	≤ 10,000	≤ +3 (+37.4)	≤ 5
5	not specified	not specified	≤ 100,000	≤ +7 (+45.6)	> 5
6	x	x	x	≤ +10 (+50.0)	x

Why should you focus on your ISO 8573-1 specifications?

Certain industries like the pharmaceutical and food industry requires high-quality compressed air. By meeting the ISO 8573-1 standard requirements you can:

- ✔ **Ensure Process and Product Safety:**
 Potential incidents, like contaminants meeting food via water and oil, can create safety concerns and unreliable processes.
- ✔ **Avoid Production Failures and Poor Quality Finishes:**
 Contaminants mixing with applications effect product results.
- ✔ **Prevent production downtime:**
 Processes and machines are stopped to find and eliminate the contamination issues.

S605

Portable Breathing Air Quality Analyzer

Coming
Soon!

ALL IN ONE
O₂, CO₂, CO, H₂O,
Oil, Pressure

PLUG & PLAY
Simple connection
to your system

PORTABLE DEVICE
Can be carried
with one hand

**HIGH
PRECISION**
Accurate
measurements

**COMPACT
DESIGN**
Simple and
efficient handling

**COMMUNICATION
INTERFACE**
Modbus TCP/RTU,
4G-Modem

Benefits

- ✔ All-in-one Instrument measures O₂, CO₂, CO, Dew Point and Oil Vapor simultaneously in the breathing air
- ✔ Portable and lightweight measuring device in a robust carry case
- ✔ Testing quality of breathing air according to national and international standards
- ✔ Software guided measurement makes it easy to generate reliable results and reports
- ✔ Only one gas inlet for all parameters
- ✔ Integrated data logger saves data for later analysis

Real-time breathing air quality measurements

The purity of the breathing air is vital for the operators health and safety. It is essential to have regular purity checks of the supplied air.

The SUTO S605 Portable Breathing Air Quality Analyzer, measures O₂, CO₂, CO, Dew Point, Oil Vapor and Pressure as defined in the breathing air purity standards and instantly shows the measured values on the touch screen display.

The robust design, quick sensor response times, and a user-friendly user interface ensures reliable and quick measurements, resulting in maximum protection for the people using air for breathing applications.

It is smarter, faster and more convenient than the traditional methods.

Monitoring of all breathing air parameters

O₂	Oxygen	CO	Carbon Monoxide
CO₂	Carbon Dioxide	H₂O	Humidity
According to all relevant national and international standards		OIL	Oil Residues

7 in 1 Measurement Device

- O₂** **Oxygen Measurement**
 For safety reasons, it is recommended to measure the oxygen level in the breathing air. The optical oxygen sensor monitors the O₂ content and indicates deviations from the standard concentration.
- CO₂** **Carbon Dioxide Measurement**
 The intake air may also be exposed to increased concentration of carbon dioxide. Filter material used in compressed air can adsorb, but also release CO₂. The gas is measured by the NDIR sensor to avoid extreme concentrations above 1000 ppm.
- CO** **Carbon Monoxide Measurement**
 The compressor intake air may be contaminated with CO due to nearby combustion engines or heating systems. Carbon monoxide is a toxic and life-threatening gas which will be monitored accurately by an electrochemical sensor.
- H₂O** **Humidity Measurement**
 High humidity can cause corrosion and in severe cases lead to bursting air containers. In cold environment, it can freeze and block the air supply. The integrated dew point sensor is crucial to check the proper water removal of the dryers and filters.
- OIL** **Oil Vapor Measurement**
 Atmospheric oil vapor contained in industrial air environment can get into the system through the compressor intake. Compressed into the breathing air, the oil contaminants can cause health issues. The state-of-the-art sensor technology detects the oil contaminants immediately.
-  **Pressure Measurement**
 The pressure sensor provides additional pressure data about the compressed air system using state of the art sensor technology.
-  **Integrated Data Logger**
 The integrated data logger records all channels in parallel for later analysis. The 5" touchscreen allows you to interact with the device on site. There is no need for a PC to manage the device.

Create Breathing Air Quality Reports

The S605 enables users to create powerful PDF reports directly on site. Customer related data as well as service provider details can be entered on-screen, making it even easier to perform audits and to create meaningful reports.

PDF reports can be created from any recordings on the device and are copied on the fly to a connected USB drive for direct print-outs.

Applications

Operators of breathing air systems are required to fill respiratory air in line with international standards such as EN 12021 or CFSR 1910.134(d). Potential hazards due to impurities in the breathing air can have consequences which endanger health or which are even life-threatening.

Regular checks with the Breathing Air Quality Analyzer S605 is an indispensable part for a safe operation.

Remote Connection

By connecting a 4G/LTE modem to the designated USB port, S605 can be monitored remotely through S4A software.

Relevant standards for breathing air

Relevant standards including BS EN 12021, DEF STAN 68-284, OSHA, CSA and BS 8478 require adherence to specific limits of constituents in breathing air. Here some examples of the required for industrial breathing air:

Contaminant	Europe	China	USA	Canada
Standard	EN 12021	GB/T 31975-2015	CFSR	CSA
O₂	20 -22 %	19.5 - 23.5 %	19.5 - 23.5 %	20 – 22 %
CO₂	500 ppm	≤ 1000 mL/m ³	1,000 ppm	500 ml/m ³
CO	5 ppm	≤ 10 mL/m ³	10 ppm	5 ml/m ³
H₂O	PDP: < -11 °C 1) H ₂ O: <35 mg/m ³ 2) H ₂ O: <25 mg/m ³	ADP: ≤ -45.6 °C	---	---
VOC (Oil Vapor)	0.5 mg/m ³	≤ 5.0 mg/m ³ (Oil mist and particle)	5 mg/m ³	1 mg/m ³
Odor	no	no	no	no

Dimensions

Due to the small dimensions of the robust and light carry case, the S605 can be easily transported anywhere.

Why is breathing air quality testing important?

- ✓ It protects the health, safety and well-being of your employees and people who are on your premises.
- ✓ It ensures that your compressor, products and personnel are protected from airborne volatile organic compounds (VOCs) as well
- ✓ It ensures that your business complies with national and international regulatory standards for breathing air quality.
- ✓ It ensures that your compressed air and work environment have safe levels of oxygen, lubricants, oil, odor, taste, carbon dioxide, carbon monoxide and water.

S605 Portable Breathing Air Quality Analyzer

Order No.	Description
P560 0605	S605 Portable Breathing Air Quality Analyzer, touch screen interface, data logger, guided measurement, PDF report generator (with oil vapor sensor refer to Europe, USA, Canada standards) *
P560 1605	S605 Portable Breathing Air Quality Analyzer, touch screen interface, data logger, guided measurement, PDF report generator (with oil mist and particle sensor refer to China standards)*
A1670	USB 4G dongle, including S4A software

* Including:

- Hand carry case with handle and shoulder belt
- USB OTG memory stick
- Purge filter for pre-measurement (test kit)
- Power adapter with USB type-C connector and cable included 60 W 20 V/3.25 A
- Connection hose 1.5 m, one end quick coupling, one end compressed air coupling
- M12 connector
- Filling bottle
- Certificate of calibration
- Operation and instruction manual

Accessories

Order No.	Description
A554 0602	Purity test kit consisting of zero filters for oil vapor, particles, and a desiccant cartridge for low dew point creation
A554 1203	Oil vapor zero filter, 1.5 MPa max, with quick connectors at both ends
A554 1204	Particle zero filter, 1.5 MPa max, with quick connectors at both ends
A554 1205	Dew point test kit for low dew point generation, with quick connectors at both sides
A604 0004	Pressure reducer, inlet pressure 0-30 MPa, outlet pressure 0.6 MPa
A604 0005	Pressure reducer, inlet pressure 0-40 MPa, outlet pressure 0.6 MPa

Service and Calibration

Stationary Breathing Air Quality Analyzer

Coming Soon!

ALL IN ONE
O₂, CO₂, CO,
Dew Point,
Oil Vapor, Pressure

**RELIABLE
WARNING**
Alarms can be
programmed

EASY HANDLING
Clear and user friendly
user guidance

**HIGH
PRECISION**
Accurate
measurements

**ROBUST
DESIGN**
Suitable for harsh
industrial condition

**COMMUNICATION
INTERFACE**
Modbus TCP/RTU,
4G-Modem

Benefits

- ✓ All-in-one Instrument measures O₂, CO₂, CO, Dew Point and Oil Vapor simultaneously in the breathing air
- ✓ 24/7 permanent breathing air monitoring with programmable alarm settings
- ✓ Testing quality of breathing air according to national and international standards
- ✓ Compressed air connection via 6 mm tube
- ✓ Only one gas inlet for all parameters
- ✓ Integrated data logger saves data for later analysis

Contant breathing air quality monitoring

When it comes to breathing air, the health and safety of humans has highest priority. Still fatal accidents have occurred in the past due to the contaminated air.

To ensure the highest safety when breathing air is supplied, an online measurement system is required. Traditional breathing air analyzes have been carried out, by taking samples and later analyze them in an external laboratories. Online systems have been rarely available and often did come with very high investments and intense process modifications.

SUTO is here to change that. The S606 Breathing Air Quality Analyzer combines latest sensor technology into a single Plug & Play measurement solution.

S606 constantly measures O₂, CO₂, CO, Dew Point, Oil Vapor and Pressure as defined in the breathing air purity standards and notifies users in real-time when the purity is not within the defined limits.

It is smarter, faster and more convenient than the traditional methods.

Monitoring of all breathing air parameters

O₂	Oxygen	CO	Carbon Monoxide
CO₂	Carbon Dioxide	H₂O	Humidity
According to all relevant national and international standards		OIL	Oil Residues

Applications

The S606 is a compact wall-mounted breathing air quality analyzer which measures all crucial breathing air parameters, to ensure that the breathing air is safe for health and the process.

Crucial Industries and Sectors rely on a reliable breathing air supply, e.g. fire fighting, diving, spray painting, chemical industry, offshore and high tech applications.

7 in 1 Measurement Device

O₂

Oxygen Measurement

For safety reasons, it is recommended to measure the oxygen level in the breathing air. The optical oxygen sensor monitors the O₂ content and indicates deviations from the standard concentration.

CO

Carbon Monoxide Measurement

The compressor intake air may be contaminated with CO due to nearby combustion engines or heating systems. Carbon monoxide is a toxic and life-threatening gas which will be monitored accurately by an electrochemical sensor.

OIL

Oil Vapor Measurement

Atmospheric oil vapor contained in industrial air environment can get into the system through the compressor intake. Compressed into the breathing air, the oil contaminants can cause health issues. The state-of-the-art sensor technology detects the oil contaminants immediately.

Pressure Measurement

The pressure sensor provides additional pressure data about the compressed air system using state of the art sensor technology.

Integrated Data Logger

The integrated data logger records all channels in parallel for later analysis. The 5" touchscreen allows you to interact with the device on site. There is no need for a PC to manage the device.

CO₂

Carbon Dioxide Measurement

The intake air may also be exposed to increased concentration of carbon dioxide. Filter material used in compressed air can adsorb, but also release CO₂. The gas is measured by the NDIR sensor to avoid extreme concentrations above 1000 ppm.

H₂O

Humidity Measurement

High humidity can cause corrosion and in severe cases lead to bursting air containers. In cold environment, it can freeze and block the air supply. The integrated dew point sensor is crucial to check the proper water removal of the dryers and filters.

Remote Connection

By connecting a 4G/LTE modem to the designated M12 port, S606 can be monitored remotely through S4A software.

Relevant standards for breathing air

Relevant standards including BS EN 12021, DEF STAN 68-284, OSHA, CSA and BS 8478 require adherence to specific limits of constituents in breathing air. Here some examples of the required for industrial breathing air:

Contaminant	Europe	China	USA	Canada
Standard	EN 12021	GB/T 31975-2015	CFSR	CSA
O₂	20 - 22 %	19.5 - 23.5 %	19.5 - 23.5 %	20 - 22 %
CO₂	500 ppm	≤ 1000 mL/m ³	1,000 ppm	500 ml/m ³
CO	5 ppm	≤ 10 mL/m ³	10 ppm	5 ml/m ³
H₂O	PDP: < -11 °C 1) H ₂ O: <35 mg/m ³ 2) H ₂ O: <25 mg/m ³	ADP: ≤ -45.6 °C	---	---
VOC (Oil Vapor)	0.5 mg/m ³	≤ 5.0 mg/m ³ (Oil mist and particle)	5 mg/m ³	1 mg/m ³
Odor	no	no	no	no

Why is breathing air quality testing and monitoring important?

- ✔ It protects the health, safety and well-being of your employees and people who are on your premises.
- ✔ It ensures that your compressor, products and personnel are protected from airborne volatile organic compounds (VOCs) as well
- ✔ It ensures that your business complies with national and international regulatory standards for breathing air quality.
- ✔ It ensures that your compressed air and work environment have safe levels of oxygen, lubricants, oil, odor, taste, carbon dioxide, carbon monoxide and water.

S530

Ultrasonic Leak Detector

Eco Version

EASY TO USE
Find leaks in minutes

LASER POINTER
To spot the leak

COMPACT DESIGN
Can be used anywhere

NOISE ISOLATED HEADSET
Inaudible signals easily to be heard

LONG BATTERY LIFE

Operation Principle

When gases are leaking through tubes and tanks, an ultrasonic sound is produced which can be detected by the S530 even from several meters away. The S530 transforms these inaudible signals into a frequency which can be easily heard by using the supplied noise isolated headset.

The integrated laser pointer helps to spot the leak from distance. In unpressurized systems, an ultrasonic tone generator can be used whose sound will leak through small openings.

Save Your Time and Costs

Leaks in compressed air systems can significantly increase the cost of compressed air.

The detection of leaks is an important maintenance requirement, which can be done by soapy water or in a more convenient way with ultrasonic leak detectors like S530.

The S530 Leak Detector is providing an easy-to-use and cost-efficient solution to detect leaks in compressed air and gas systems.

Applications

- Leak detection in compressed air, refrigerants, simply of any gas!
- Insulation test of doors and windows
- Detection of partial electrical discharges causing damages on insulations

Easy to use

Leak Detection

Point with the laser at an assumed leak. The display will show the level of the leak.

Detection at medium distance for locating the leakage area.

Scan with the focus tube and focus tip the roughly location till the exact location is found.

Technical Data

Headset connection	3.5 mm stereo phone jack

General data

Display

Integrated	3 colour black-mask LCD, 10 level
------------	-----------------------------------

Material

Housing	PC + ABS
---------	----------

Miscellaneous

Protection class	IP30
Approvals	CE
Weight	2.5 kg for the full set

Operating conditions

Medium	Compressed Air, refrigerants and any compressed gases
Ambient temperature	0 ... +40 °C
Ambient humidity	< 90 % rH
Storage temperature	-10 ... +50 °C
Transport temperature	-20 ... +50 °C

Cost Saving

Compressed air is one of the most expensive energy forms. In Germany alone, 60,000 pneumatic systems consume 14,000,000,000 kWh electricity every year. 15 % to 20 % of this could easily be saved (Peter Radgen, Fraunhofer Institute, Karlsruhe). A large portion of these costs are caused by leaks in compressed air systems, allowing the air to "escape" unused.

Calculation example at 0.6 MPa:

1 hole of 1mm diameter = 270 EUR/year

Option

Ultrasonic tone generator to be used in pressure less systems. The generator emits ultrasonic waves which can be detected by the S530.

S531

Smart Ultrasonic Leak Detector

MASS STORAGE
Almost unlimited memory for leak records, photos and voice recording

DETECT FROM DISTANCE
Finds leaks in compressed air system easily even from distance

WIRELESS CONNECTION
Wireless connection to headset

ANALYSIS
Export data to LMS for statistics and repair

PHOTOGRAPH LEAK PARTS
Build in camera to take photo of leak locations

LOSS CALCULATE
Calculates air loss in m³/h or in local currency

VOICE RECORDING
Voice recorder for voice memos

NOISE REDUCTION
Integrated noise reduction

LASER
Pinpoint locations with laser pointer

LONG WORKING HOURS
Battery capacity for up to 6 hours

Benefits

- ✔ Finds leaks in compressed air system easily even from distance
- ✔ Full support for Leak Surveys with the SUTO Leak Management Software (LMS)
- ✔ The perfect tool for professional leak detection
- ✔ Fast return on investment
- ✔ Easy to use, but powerful in performance

Detect and manage your compressed air leaks — save your time and costs

Finding leaks in the compressed air system is the first step into energy saving. The leaking compressed air causes immense electrical costs, as your compressors are running more than they would actually need to run.

S531 is a smart ultrasonic leak detector that helps users quickly find and record leakages in compressed air or any gas systems. The built-in touch screen assists the user easy operation in leak detecting. Photographing and voice recording make leak surveys more flexible and efficient.

S531 is designed to work with SUTO Leak Management Software (LMS) to enable companies to properly manage their leakage detection and repair activities.

Leak Management Software (LMS)

LMS included for free

When purchasing a S531 set, one free LMS license is included. Start immediately creating powerful leak reports, without paying extra for additional software licenses.

Leak Detection

Point with the laser at an assumed leak. The display will show the level of the leak.

Detection at medium distance for locating the leakage area. Record the leak losses at closer distance.

If needed, scan with the focus tube and focus tip till the exact location is found.

Seamless Connection with Leak Management Software (LMS)

Cost Saving

Compressed air is one of the most expensive energy forms. Scope of delivery

LMS

Leak Management Software

Manage your compressed air leaks —
save your time and costs

The Leak Management Software (LMS) provides a total solution for leak detection, management and easy report creation. The software comes as a local installation on a PC and works seamlessly with our S531 ultrasonic leak detector. Recording leaks in the field using SUTO S531 leak detector and later importing them to LMS software enables users to gather quantitative leak loss data and easily create powerful reports which provide a full overview of the customers' leak situation.

Benefits

- ✔ Simple and user-friendly user interface for easy navigation and leak survey handling
- ✔ Reports can be personalized with your own company logo and contact information
- ✔ Save your valuable time in report documentation by having a one-click report
- ✔ Adjust your reports to local specifications by using the integrated unit converter

Convenient User Experience

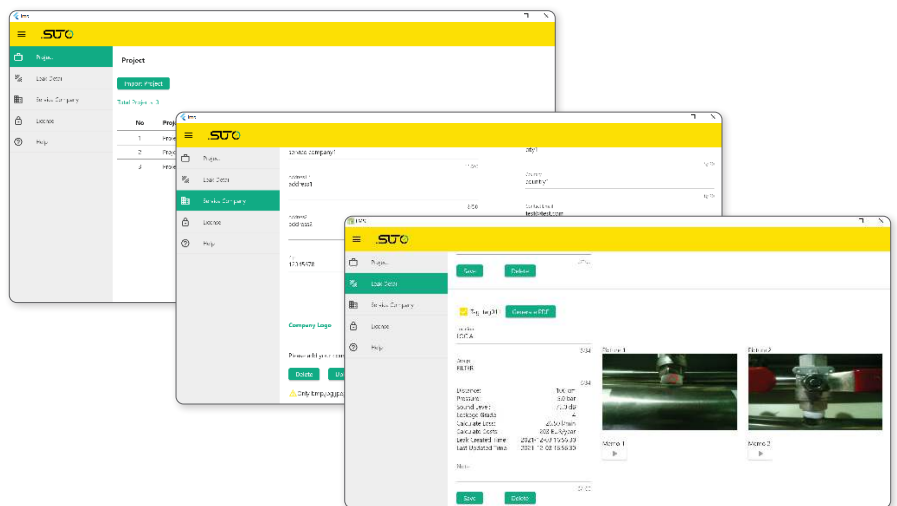

FLAT INTERACTION DESIGN
Simplify the operation steps

LOCAL INSTALLATION
Easy to install and save your data locally

ONE-CLICK IMPORT AND UPDATE
Import and update new leak data just by a simply click

Powerful Analysis Reports

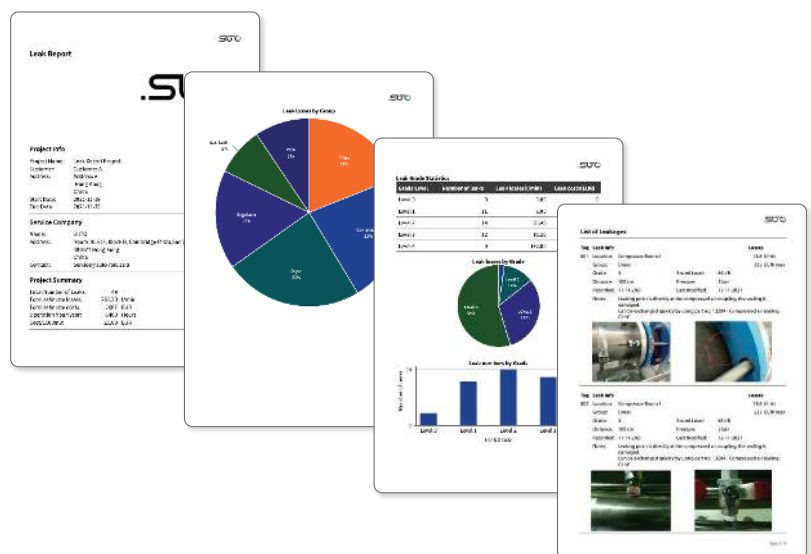

EXTENSIVE ANALYSIS REPORT
Leak report with all relevant data

PERSONALIZED CONFIGURATION
Upload your company logo, contact person etc.

PRINT CONTENT OPTIONAL
Select your desired leaks to be printed

Seamless Connection with S531

Included in S531 for free

When purchasing a S531 ultrasonic leak detector set, one free LMS license is included. Start immediately creating powerful leak reports, without paying extra for additional software licenses.

Ordering

Leak Management Software (LMS)

Order No.	Description
M599 7045	Leak Management Software (LMS), Local installation, 1 license (bound to local PC)*, one-time payment

* The software license is bound to the local PC, still the same software can be used by multiple users on the same PC.

sales@suto-itec.com

Trial Period

Test it for 30 Days!

If you want to try LMS we are offering a 30 days trial period with full functionality.

When the 30 days are due to expire, in order to continue using the software you need to buy a license.

S110

Power and Energy Meter

S110

S110-P

MULTIFUNCTION POWER AND ENERGY METER
3-phase, 1-phase

COMPRESSOR PERFORMANCE
Helps to identify compressor efficiency

MODBUS/RTU INTERFACE
Connects to any Modbus-Master

ROGOWSKI COILS
Wide range, highly accurate

Benefits

- ✓ Convenient and easy to set up compressor performance and efficiency monitoring
- ✓ Real power consumption in kW and kWh by measuring each phase voltage and current
- ✓ DIN rail installation for power cabinets or portable version with rugged housing
- ✓ Power range up to 2 MW (2000 kW)
- ✓ Three current sensor models with 100 A, 1000 A or 3000 A available

Operation Principle

The SUTO Power and Energy Meter has been designed with a focus on easy installation and reliable measurements. The main application is to measure the power consumption and the accumulated energy consumption of electrical 3-phase consumers, like compressors, driers and oxygen/nitrogen generators.

The main difference to common power measurements is that all relevant parameters are real measured values and not assumptions. Unlike the traditional method, where only one phase is measured, the voltage is assumed as stable and the phase shift is entered as a constant, the S110 measures the voltage and current of each phase.

By this, the S110 is much more accurate and delivers more reliable measurements compared to single phase current measurements.

Application

In this illustration, a Power and Energy Meter is installed directly into the connection box of the compressor.

The Rogowski current coils are easy to install, by just clamping them around the power cables. The voltage connection can be drawn directly from the power cabinet of the compressor.

The Power and Energy Meter is then connected to a S330 / S331 Display and Data Logger to record the Voltage and Current of each phase, as well as recording the actual power consumption and the total energy consumption.

This is not only used to identify inefficient compressors, but also letting the compressed air operator know what the real costs of the compressed air are.

S110

S110

Power and Energy Meter

S331

Data Logger

S330 / S331 can be used as stationary display of up to 16 power meters

Rogowski Coils

Compressor

Filter

Current Measuring via Rogowski coils offers a high accuracy over a wide range and an easy installation. (Note: for each phase, one coil is needed)

S110-P

Monitoring Software

Wireless Connection

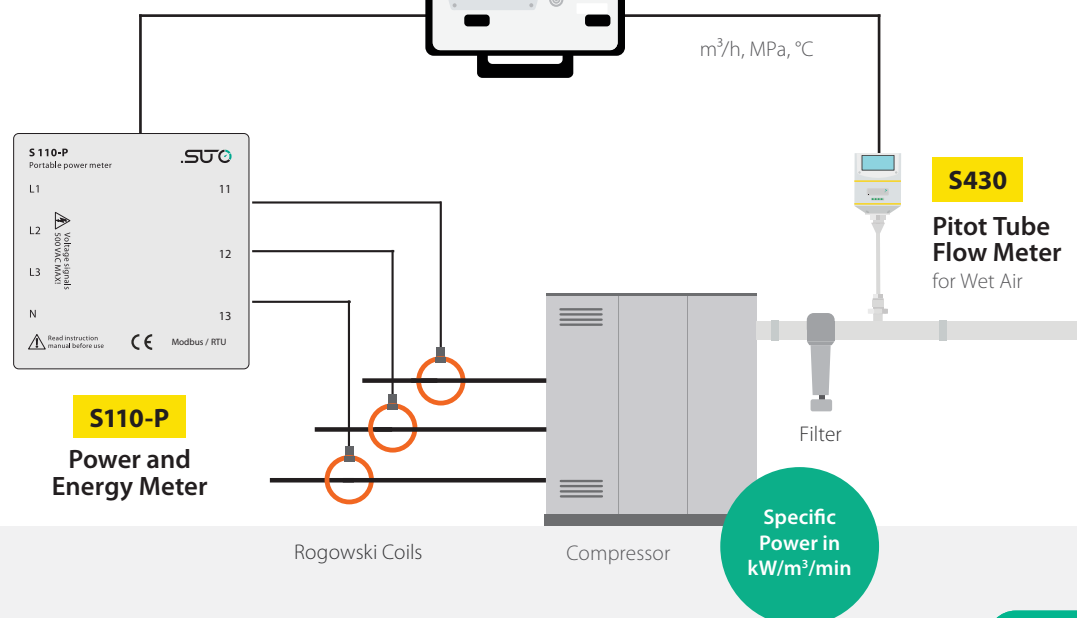

S551

Portable Data Logger

Can be used as onsite portable display

Compressor Efficiency Test

Knowing your compressor efficiency is the first step for your energy saving goals. With this solution you will know, how much electrical energy is needed to produce 1 m³ compressed air and what are the electrical costs.

S110 Power and Energy Meter

Order No. Description

Stationary

D554 0130	S110 Power and Energy Meter, hat rail, Modbus/RTU, 24 VDC supply
S554 0140	Electrical Current Transmitter for S110, 1000 A, 100 mm diameter, 1.8 m cable, open ends
S554 0141	Electrical Current Transmitter for S110, 3000 A, 150 mm diameter, 1.8 m cable, open ends
S554 0142	Electrical Current Transmitter for S110, 100 A, 16 mm diameter, 1.8 m cable, open ends

Portable

P554 0134	S110-P Portable Power and Energy Meter, incl. 5 m connection cable to S551 (Modbus/RTU), 4 voltage test leads and 4 test clips
S554 0160	Electrical Current Transmitter for S110-P, 1000 A, 100 mm diameter, 1.8 m cable, connector to S110-P
S554 0161	Electrical Current Transmitter for S110-P, 3000 A, 150 mm diameter, 1.8 m cable, connector to S110-P
S554 0162	Electrical Current Transmitter for S110-P, 100 A, 16 mm diameter, 1.8 m cable, connector to S110-P

S010 / S011

Pressure Transmitter

Seamless Integration into your Compressed Air System

Pressure is the key point in a compressed air system. This makes it crucial to keep the pressure at a constant and reliable level. Monitoring and measuring the compressed air pressure is needed to save energy, identify degrading at an early stage and keep production machinery running.

SUTO pressure transmitters are made to seamlessly integrate into your compressed air monitoring system and provide reliable measurement results.

Available in Three Ranges

- 0 ... 1.6 MPa(g)
- 0 ... 4.0 MPa(g)
- 0 ... 0.16 MPa(abs.)

Signal Output

The pressure sensor is offered as a 2-wire analog output version for easy connection.

For modern monitoring solutions, the Modbus/RTU version allows to easily connect multiple sensors to a single data logger.

S010

4 ... 20 mA

S011

Modbus/RTU

Benefits

- ✓ High accurate and affordable industrial pressure transmitter
- ✓ Excellent anti-interference capability (EMC, EMI)
- ✓ Salt-spray, temperature and humidity tested
- ✓ IP67 protection
- ✓ 4 ... 20 mA loop powered or Modbus/RTU output

Industrial equipment for manifold applications

- Hydraulic and pneumatic systems
- Industrial engines
- HVAC/R equipment
- Spraying systems
- Cooling systems

Electrical connection	M12 Connector
Protection class	IP67
Approvals	CE
Process connection	G1/4" (ISO 228/1)

Operating conditions

Medium temperature	-40 ... +85 °C
Ambient temperature	-40 ... +85 °C
Storage temperature	-40 ... +125 °C

Dimensions (4 ... 20 mA Type)

Dimensions (Modbus/RTU Type)

Ordering

Please use the following tables to assist in placing your order with our sales staff.

S010 Pressure Transmitter

Order No.	Description
S694 3557	Pressure Transmitter, 0 ... 1.6 MPa(g), 2-wire 4 ... 20 mA output, incl. M12 connector, G1/4" thread
S694 3558	Pressure Transmitter, 0 ... 4.0 MPa(g), 2-wire 4 ... 20 mA output, incl. M12 connector, G1/4" thread
S694 2564	Pressure Transmitter, 0 ... 0.16 MPa(a), 2-wire 4 ... 20 mA output, incl. M12 connector, G1/4" thread
A553 0104	Sensor cable 5 m, with M12 connector, open wires, AWG 24 (0.2 mm ²)
A553 0105	Sensor cable 10 m, with M12 connector, open wires, AWG 24 (0.2 mm ²)
R200 0030	Pressure Transmitter calibration at 3 points

S011 Pressure Transmitter

Order No.	Description
S694 2559	Pressure Transmitter, 0 ... 1.6 MPa(g), Modbus/RTU, incl. M12 connector, G1/4" thread
S694 2562	Pressure Transmitter, 0 ... 4.0 MPa(g), Modbus/RTU, incl. M12 connector, G1/4" thread
S694 2563	Pressure Transmitter, 0 ... 0.16 MPa(a), Modbus/RTU, incl. M12 connector, G1/4" thread
A553 0104	Sensor cable 5 m, with M12 connector, open wires, AWG 24 (0.2 mm ²)
A553 0105	Sensor cable 10 m, with M12 connector, open wires, AWG 24 (0.2 mm ²)
R200 0030	Pressure Transmitter calibration at 3 points

S020

Temperature Transmitter

Two Versions

The compact sensor solution with 4 ... 20 mA output available in 2 sizes

Industrial Equipment for Manifold Applications

The temperature transmitter is a sensor which is designed to measure the temperature of liquid, vapour, compressed air and gases within the permissible operating parameters.

- Measure the inlet / outlet temperature of dryers
- Measure the outlet temperature of compressors

Benefits

- ✓ High accurate and affordable industrial temperature sensor
- ✓ Easy installation in compressed air systems
- ✓ 4 ... 20 mA transmitter
- ✓ Wide range of -50... +250 °C

Compression Fitting

There are different types of compression fittings available:

- Compression fitting 6mm, G1/2", PTFE ring, 0.6 MPa
- Compression fitting 6mm, G1/2", metal ring, 1.6 MPa

Technical Data

Measurement

Temperature

Accuracy	0.5 % o.RGD + 0.2 % FS
Measuring range	-50 ... +200 °C
Sensor	PT100 Class A

Signal / Interface & Supply

Analog output

Signal	4 ... 20 mA, (2 wire loop powered)
Scaling	4 mA = -50 °C, 20 mA = +200 °C
Load	Max 250 Ohm

Supply

Voltage supply	16 ... 30 VDC
Current consumption	Max. 20 mA

Data interface

Connection	M12 connector
------------	---------------

General data

Material

Process connection	Stainless steel 1.4571
Housing	Stainless steel 1.4571
Metal parts	Stainless steel 1.4571

Miscellaneous

Electrical connection	M12 connector
Protection class	IP67
Approvals	CE
Process connection	6 mm Fitting
Weight	0.08 kg

Operating conditions

Ambient temperature	-40 ... +90 °C
---------------------	----------------

Ordering

Please use the following table to assist in placing your order with our sales staff.

S020 Temperature Transmitter

Order No.	Description
S693 0003	Temperature Transmitter, -50 ... +200 °C, 4 ... 20 mA loop powered, 6 x 150 mm sensor tube
S693 0004	Temperature Transmitter, -50 ... +200 °C, 4 ... 20 mA loop powered, 6 x 300 mm sensor tube
A554 6003	Compressor fitting 6 mm, G½", PTFE ring, 0.6 MPa
A554 6004	Compressor fitting 6 mm, G½", metal ring, 1.6 MPa
A553 0104	Sensor cable, 5 m with M 12 connector, open wires, AWG 24 (0.2 mm ²)

S030

Electrical Current Transmitter

Benefits

- ✔ Easy installation
- ✔ Wide measuring range
- ✔ Accurate current sensing
- ✔ 4 ... 20 mA output signal
- ✔ IP67 casing provides robust protection in the industrial environment

Accurate current measurement

SUTO current sensor is an AC RMS current sensor composed of a flexible active part (Rogowski coil model) connected to a compact digital converter, capable of measuring the current carried on a power conductor up to a value of 3000 A AC.

The digital converter supplies an output of 4 ... 20 mA DC in linear proportion to the measured current.

Current Transmitter Application

- Current sensing at compressors for load / unload analysis
- Current sensing for power / energy measurement
- Evaluation of machine operation hours

Position Sensitivity

Conductor Position	Typical Error(%)
●	< 0.5 %
●	< 0.8 %
●	< 1 %

Single Phase Power Measurements

By measuring the current of a symmetric power consumer on one phase, compressed air experts are able to calculate the power consumption of the compressors without the need of measuring voltage additionally.

This offers an analysis of the compressor and allows to judge the efficiency of the system.

Technical Data

Measurement

Current

Accuracy 0,5 % of reading + 0,2 % of range

Signal / Interface & Supply

Analog output

Signal 4 ... 20 mA 3-wire

Scaling 4 mA = 0A AC,
20 mA = 1000A / 3000 A AC

Load Max. 300 Ohm

Supply

Voltage supply 10 – 32 VDC

Current consumption Max. 30 mA

Data interface

Connection open wire ends / ODU connector

General data

Miscellaneous

Protection class IP67

Approvals CE

Operating conditions

Ambient temperature 0 ... +80 °C

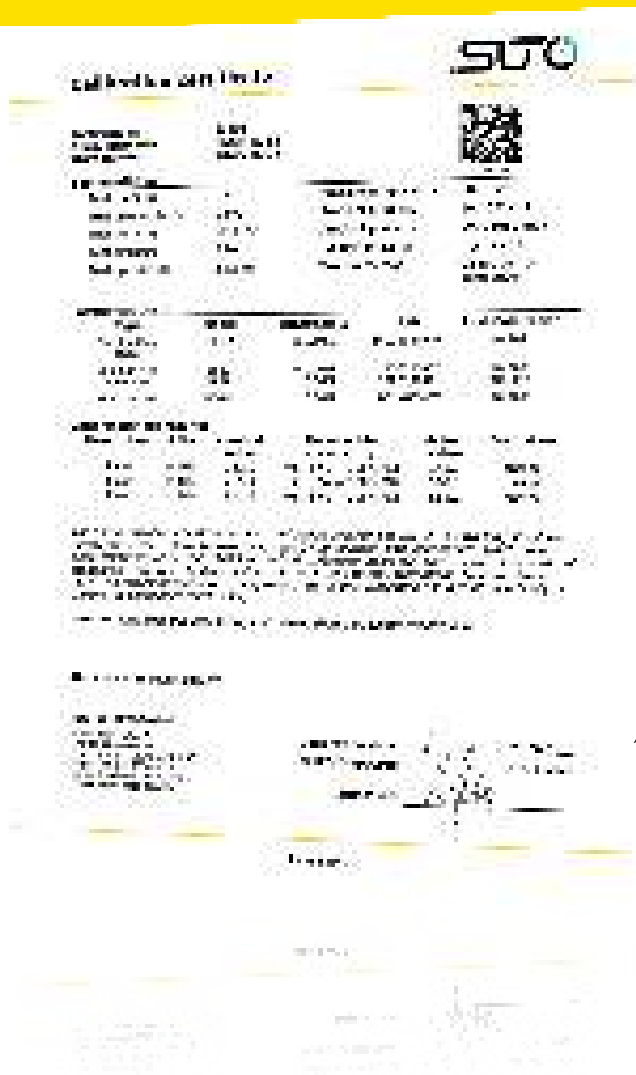

Ordering

Please use the following table to assist in placing your order with our sales staff.

S030 Electrical Current Transmitter

Order No.	Description
S554 0155	Electrical Current Transmitter, 1000 A, 100 mm diameter, open wire ends
S554 0156	Electrical Current Transmitter, 1000 A, 100 mm diameter, including connector to S551
S554 0157	Electrical Current Transmitter, 3000 A, 150 mm diameter, including connector to S551
S554 0158	Electrical Current Transmitter, 3000 A, 150 mm diameter, open wire ends

Calibration and Certification

FLOW CALIBRATION

PARTICLE CALIBRATION

OIL VAPOR CALIBRATION

EXCHANGE CALIBRATION

DEW POINT CALIBRATION

PRESSURE CALIBRATION

TEMPERATURE CALIBRATION

SUTCO | Exchange Service

Exchange Service

No Downtime anymore!

The exchange calibration service eliminates down time and enables users to have a seamless record of their dew point measurements.

The user receives in advance a calibrated instrument with calibration certificate and the same instrument settings. The onsite instrument is then switched against the calibrated one and returned to the supplier.

Ordering

Please use the following table to assist in placing your order with our sales staff.

Calibration and Certification

Order No.	Description
R200 0001	Flow calibration with certificate
R200 0005	Oil-& grease-free cleaning option for flow sensors (For Oxygen, it is already included in A1009.)
R200 0020	Re-calibration, real gas: O ₂ , Ar, CO ₂ , H ₂ (H ₂ real gas calibration needs to consult with manufacturer in advance)
R200 0021	Re-calibration, real gas: CH ₄ , NG, N ₂ O (please consult with manufacturer in advance)
R200 0022	Real gas calibration for He
R200 0030	Pressure sensor calibration 16bar(g) type, at 3 points
R200 0040	Re-calibration ultrasonic flow meter S460
R200 0050	Dew point calibration, one additional point, freely selectable in the range -75 ... +20 °C Td
R200 0070	Calibration for S531
R200 0080	Re-calibration per unit for S110 power meters or Rogowski coils
R200 0120	General service and re-calibration: - General inspection of the unit - Replacement of tubes and fittings - Cleaning of lamp and sensor - Assembly and test of unit - Calibration of oil sensor S120
R200 0130	Calibration for particle counter S130
R200 0131	Calibration for particle counter S132
R200 0600	S600 Service and calibration: - General inspection of the unit - Replacement of tubes and fittings - Cleaning of components - Calibration oil vapor, particle and dew point sensor - Assembly and test of unit - Calibration
R200 0610	Isokinetic sampler service / flow calibration
R699 3396	Dew point sensor calibration
R200 4610	Calibration for S461 ultra sonic transducer pair
R200 4613	Calibration for S461 temperature sensor
R200 4620	Calibration for S462

Accessories

Ordering

Please use the following table to assist in placing your order with our sales staff.

Order No.	Description	Application	Picture
C190 0002	Closing cap for S421/S452 material: 1.4404	To close the measuring sections in case the sensor unit is removed	
C190 0060	Thread adaptor, G 1/2" internal to PT 1/2" external, SUS303	Used to adapt S401 or S450 to a PT thread ball valve	
C190 0065	Thread adaptor, G 1/2" internal to NPT 1/2" external, SUS303	Used to adapt S401 or S450 to a NPT thread ball valve	
C190 0116	Flow conditioner	Wafer type flow conditioners, which is flanged between two flanges 5-8 times diameter upstream of the flow meter. Please specify nominal pipe diameter and pressure	
A530 1105 / A530 1106 / A530 1111 / A530 1113	High pressure installation device. To be used for pressure > 1.5 MPa	For safety reasons we recommend using this installation device whenever the operating pressure exceeds 1.5 MPa * A530 1105 - High pressure installation device for S400/S401-220 mm * A530 1106 - High pressure installation device for S450-220 mm * A530 1111 - High pressure installation device for S400/S401-400 mm * A530 1113 - High pressure installation device for S450-400 mm	
A530 1108	SUTO spot drilling device G 1/2" for S401, S450 and S409	This drilling tool is used to drill holes into compressed air pipes under pressure through a ball valve	
A530 1205	HT20 G 3/4" hot tapping tool, for S430	Drill 3/4" holes into compressed air pipes under pressure through ball valves	
A553 0104	Sensor cable 5 m with M12 connector, open wires, AWG 24 (0.2 mm ²)	Used to connect SUTO sensors to a PLC or power supply	
A553 0105	Sensor cable 10 m with M12 connector, open wires, AWG 24 (0.2 mm ²)	Used to connect SUTO sensors to a PLC or power supply	
A553 0146	Sensor cable 5 m with M12 and RJ45 connectors, PoE supported, AWG 24 (0.2 mm ²)	Used to connect SUTO flow sensors to the Ethernet network via router, switch and etc.	
A553 0161	M8 female to M12 male converter cable	Used to connect the S415/S418 to a Modbus splitter	

Ordering

Please use the following table to assist in placing your order with our sales staff.

Order No.	Description	Application	Picture
A553 0165	Sensor cable, 5 pole, AWG 24 (0.2 mm ²), 50 m	Used to connect power supply and analogue signals to sensors	
A553 0166	Sensor cable, 5 pole, AWG 24 (0.2 mm ²), 100 m	Used to connect power supply and analogue signals to sensors	
A553 0167	RS-485 cable, 4 pole twisted pairs, AWG 24 (0.2 mm ²), 50 m	Used to connect power supply and RS-485 signal to sensors	
A553 0168	RS-485 cable, 4 pole twisted pairs, AWG 24 (0.2 mm ²), 100 m	Used to connect power supply and RS-485 signal to sensors	
A554 0009	Power supply for hat rail, input: 85 ... 264 VAC, output: 24 VDC, 60 W	This power supply can be used to supply sensors with 24 VDC/2.5 A It's mounted on a hat rail	
A554 0007	Power supply wall mountable, input: 85 ... 264 VAC, output: 24 VDC, 15 W, without cable	This power supply is used to supply 24 VDC to sensors and other devices	
A554 0008	½" G type ball valve	This is a proper ball valve for the installations of flow sensors S401/S450	
P554 0009	Wall thickness meter	The instrument is used to measure the wall thickness of pipes. Too often the inner diameter of pipes is not exactly known, but this information is required for an accurate flow measurement. By measuring the wall thickness and the pipe size the exact inner diameter can be calculated	
A554 0107	Mains unit 100-240 VAC/24 VDC, 0.5 A for S401 / S201 series, 2 m cable	Simple power supply for a portable S421 or S401 solution (Special plug on request)	
A554 2005	Service kit for sensor configuration including software	This service kit can be used for all SUTO sensors to change settings and check sensors	

Ordering

Please use the following table to assist in placing your order with our sales staff.

Order No.	Description	Application	Picture
A699 3491	Measuring chamber, 2 l/min @ 0.8 MPa, fast connector, without filter, max pressure 1.6 MPa, suitable for all SUTO dew point sensors	For easy connection and disconnection to compressed air system through quick-disconnector	
A699 3492	Measuring chamber, 2 l/min @ 0.8 MPa, 6 mm hose quick connector, without filter, max. pressure 1.6 MPa, suitable for all SUTO dew point sensors	For easy connection and disconnection to compressed air system through quick-disconnector	
A699 3493	By-pass-type chamber with 6 mm hose in and out connection up to 1.6 MPa	This chamber can be used in applications where the measured gas is by-passed through the chamber	
A699 3500	Measuring chamber, 4 l/min @ 0.8 MPa, hose fast connector, with filter, recommended pressure range 0.3 ... 1.5 MPa, convenient dew point measurement of gas/air with SUTO portable dew point meters	The sample gas/air is connected to the chamber through a 6 mm Teflon® hose. The chamber is mounted to the SUTO portable dew point meters through the 1/2" G-type thread connection. Parking and measurement position is selected through the handle at the chamber, which allows quick measurement results	
A699 3501	By-pass-type chamber with 6 mm hose in and out connection up to 1 MPa, convenient dew point measurement of gas/air with SUTO portable dew point meters	This chamber can be used in applications where the measured gas is by-passed through the chamber to avoid any gas/air loss. The chamber is mounted to the SUTO portable dew point meters through the 1/2" G-type thread connection. Parking and measurement position is selected through the handle at the chamber, which allows quick measurement results	
A699 3496	Measuring chamber for dryer installation, 2 l/min @ 0.8 MPa, hose fast connector, without filter, max. pressure 1.6 MPa	The sample gas/air is connected to the chamber through a 6 mm Teflon® hose. The chamber is mounted to stationary S2XX dew point sensors through the 1/2" G-type thread connection. This chamber can be conveniently mounted to the frame or cabinet of a dryer	
A699 3590	High pressure chamber up to 35 MPa	In applications where the pressure is exceeding 1.5 MPa, this chamber can be used. Through the adjustable valve a small purge is set to ensure a gas flow through the sensor element (response time)	
A554 0054	Compressed air quick coupling, female side R 1/2" thread	Connect this quick coupling to a 1/2" ball valve to set up a quick connector for measurement of dew point, oil and particle	
Dew point sensor protection caps		Protection caps are used to protect the dew point sensor element from mechanical impacts or dust. The proper cap selection depends in application. Please contact customer service	

Ordering

Please use the following table to assist in placing your order with our sales staff.

Order No.	Description	Application	Picture
A554 0002	Test pot 11.3 % rH	Is used to check dew point sensors. The pot creates a constant relative humidity of 11.3 %. The resulting dew point is depending on the ambient temperature, at 25 °C it is equal to -6.3 °C	
D500 0005	S51 panel meter, with 4 ... 20 mA input and 2 alarm outputs, 85 ... 265 VAC supply, 96 x 48 mm panel	Installations in dryers or similar equipment as dew point indicator	
C219 0055	M12 connector with RS-485 termination resistor, 120 Ω	Termination resistor for enhancing communication stability of RS-485 network Connect it to the final device of RS-485 network	
A554 3310	M12 RS-485 (Modbus) splitter	Stationary Modbus splitter for easier wiring	
A554 0011	RS-485 Repeater	A repeater is used whenever the bus length of RS-485 exceeds 500 m. After every 500 m of cable distance a repeater is recommended	
A554 0331	RS-485 / USB converter	This converter brings RS-485 to the USB port of the PC.	
D554 0031	8-channel current input module, 0 ... 20 mA, Modbus/RTU	For connecting up to 8 sensors with 0 ... 20 mA / 4 ... 20 mA signal via RS-485 to S330 / S331.	
A554 0087	USB OTG memory stick	USB memory drive for transferring data between SUTO data loggers (S331 / S551 / S120 with display / S130 with display) and a PC. The USB drive has a USB-A and a Micro-USB connector	

POWER CONSUMPTION OVERVIEW IN CATALOG

When setting up a system in which sensors and devices need to be supplied by an external power supply, please refer to the following power consumption table to select the correct power supply.

P/N	Device / Sensor	Power Consumption [W]	
S695 41XX	S401 / S421	4.8 (w/o Display)	5.8 (w/Display)
S695 415X	S415	2.9	
S695 418X	S418	2.9	
S695 419X	S418-V	2.9	
S695 045X	S450 / S452	4.5 (w/o Display)	4.8 (w/ Display)
S695 430X	S430	3.8 (w/o Display)	4.8 (w/ Display)
S695 430X	S430 PoE	4.8 (w/o Display)	5.8 (w/ Display)
S695 0409	S409	3.9	
S695 435X	S435	3.0	
S695 461X	S461	3.6	
S695 462X	S462	2.4	
S699 12XX	S211 / S215 / S220 (2-wire)	0.5	
S699 22XX	S211 / S215 / S220 (3-wire)	1.0	1.2 (w/ Display)
S699 32XX	S211 / S215 / S220 (Modbus/RTU)	1.0	1.2 (w/ Display)
S699 42XX	S211 / S215 / S220 (w/ Pr. Sensor)	1.0	1.2 (w/ Display)
S699 023X	S230 / S231	1.0	
D699 305X	S305	2.88	
D500 033X	S330 / S331	20.0	
D500 0320	S320	15.0	
S604 12XX	S120	5.0 (w/o Display)	10.0 (w/ Display)
S604 13XX	S130 / S132	5.0 (w/o Display)	10.0 (w/ Display)
D500 0601	S601	50.0	
D500 X606	S606	50.0	
D554 0130	S110	1.0
